HANDCRAFTED IN THE HEART OF AMERICA

Since 1981, Custom Wood Products has combined timeless craftsmanship with cutting edge technology. The result is beautiful cabinetry, custom made just for you.

FULLY CUSTOMIZABLE
GANG BUILT
QUALITY MATERIALS AND CRAFTSMANSHIP

Step inside and take a look.

Fully Customizable Freedom of Design

The solution is clear. More than just boxes that fit into a space, Custom Wood Products is only limited by your imagination.

Utilize every inch by sizing to $\frac{1}{8}$ " increments in width, height and depth.

Customize storage needs for a particular item or use. Wrap cabinetry around a corner or integrate it into your architecture. Enhance your space with architectural beams and wainscotting. Opt for beautiful and functional interest instead of a wall.

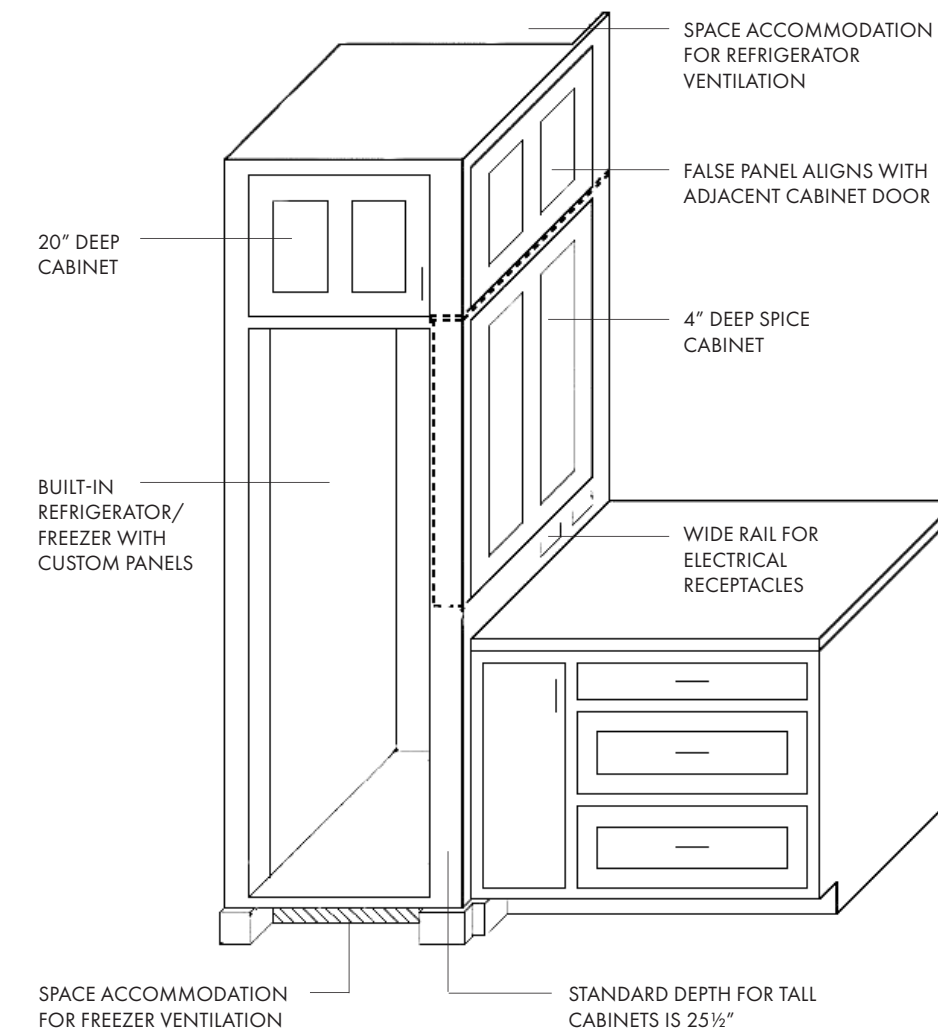

The sky is the limit.

Custom is Our Standard

Multiple cabinets come together seamlessly

For us, custom is not just about sizes. Custom fills a need; custom is ultimate flexibility. Most of all, custom satisfies anything your imagination can conceive.

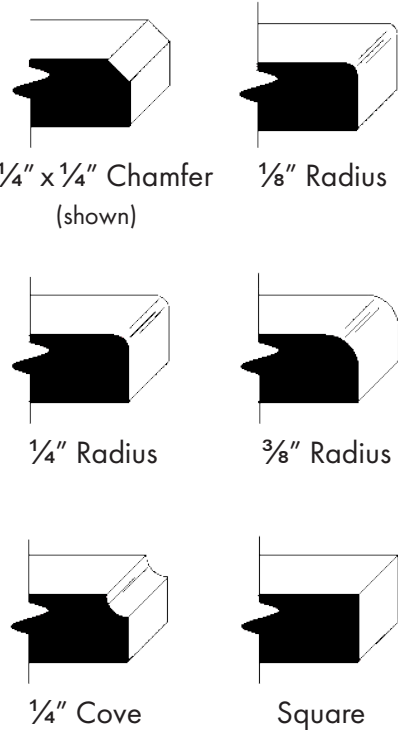

Furniture Detailing

Corner Treatments

Choose your corner treatment for a finished detail. Each profile contributes to your desired look and is one of the many reasons we are called “the furniture cabinet line.”

Paneled Ends

Our furniture ends are integrated into your cabinet side or back to offer a clean, refined look.

Of course circumstances may call for a false door or a simple, flush finished end. We have those too; each option shining in their own way.

Extra Deep Tall Cabinets

Attention to detail is most important for a quality finished look. That is why our tall cabinets are standard at 25 1/2" deep. Countertops fit beautifully, demonstrating forethought in design.

Applied Moulding

We will apply mouldings upon request.

This is advantageous whether completing a furniture piece or choosing distressing and specialty finishes.

Moulding corners are distressed then finished in a natural way, enhancing the final look of your cabinet.

Special Requests Of Course

We pride ourselves on our ingenuity and will always find a way to accommodate your needs.

Wood ventilation hoods are only limited by your imagination. Although we have several popular designs from which to choose, each hood is special.

If you can think it, we can build it. We love to say, "we will find a way."

Gang Built

Ganged cabinetry means multiple cabinets are built together with a shared face frame and partitions.

Gang construction allows you to utilize every possible inch of space. It makes installations easier, and gives your cabinetry a beautiful furniture appeal.

At Custom Wood Products, gang built cabinetry up to 12 feet long has been the standard since 1981.

While every style of cabinetry is better when gang built, full inset shines the most. Since full inset celebrates and accentuates the frame, a continuous frame offers a pristine look.

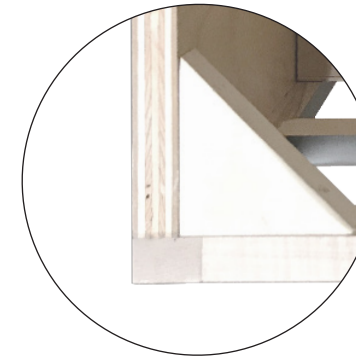

Quality Materials & Craftmanship

From solid woods and sheet goods to hardware and people, you can expect the best.

We use only select FSC grade domestically grown hardwoods.

Our standard all wood interiors are prefinished Maple plywood featuring a clear, durable Ultra-Violet (UV) top coat that is scratch and chip resistant. This durable, VOC free, UV finish clear coat brings out the warmth and beauty of the cabinet interiors.

Finished ends are 3/4" Plywood, UV finished on the inside and finished to match the cabinet exterior on the outside.

The face frame is flush routed then corner profiled for a beautifully finished end; an included element of Custom Wood Products.

All cabinet wall ends, partitions, ceilings, and floors are 1/2" Maple UV finished Plywood.

Boxes are assembled using dowel construction method, while the face frames are mortise and tenoned.

French Dovetail

English Dovetail

We utilize two types of joinery for drawer construction: French Dovetail and English Dovetail.

The sides, backs and sub faces are built of Solid Maple.

Drawer bottoms are 1/4 inch Maple veneer, glued and pinned to ensure a perfectly square and structurally sound drawer. Taller drawers are built with nine ply Baltic Birch and wider drawers have 1/2" bottoms.

No drawer would be complete without the reliable TANDEM BLUMOTION slides by Blum. We want your cabinetry to perform for a lifetime. Blum wants your drawers to open and soft close just as long.

Quality Delivery

From our factory to your home, wrapped in furniture blankets and handled with care, your cabinetry will arrive safely. Upon delivery, your cabinetry is unloaded in full view for your inspection.

Take comfort in knowing that when you receive your delivery date, our promise is to deliver on that date. Every time. Guaranteed.

Quality Limited Lifetime Warranty

We hand craft every cabinet using only the finest materials. Master craftsmen build your cabinets to stand the test of time.

This combination of superior materials and craftsmanship enables us to stand behind our work with a Limited Lifetime Warranty for as long as you own your cabinets.

If a problem arises we will resolve it. Guaranteed.
