DIVINE
CABINETS

WE PROVIDE thoughtful products and exceptional service. We provide premium cabinets for customers who are looking for affordability, convenience, and variety in their projects. We are committed to continually improve both the product quality and the design style with customers' needs in mind. As our own manufacturer, we are able to maintain quality control and strict supervision over our cabinet production process through high-tech machinery and detailed hand-crafting.

WE HIRE staff who share our commitment to crafting a product that combines beauty with precision and functionality. Over 100 dedicated tradespeople, craftspeople, technical experts, and customer service specialists proudly build Divine Cabinetry products – a team of professionals who share a passion and commitment to their craft.

WE BELIEVE success would come only by offering customers the very best service, selection, quality and value. We strive to be one of the leading providers of cabinetry throughout the country. We aim to become one of your best partners.

QUALITY REDEFINED

High-quality kitchen cabinets have at least 10 characteristics that contribute to their long lifespan. The best kitchen cabinets will be durable and beautiful for many years to come. Unfortunately, some cabinets have problems in as little as a year or two. Issues like crooked doors, sagging drawers, scratched faces, loose hinges etc. That's why it is important to choose the best kitchen cabinets with high-quality construction. As you shop for cabinets and compare cabinet costs, look for the following construction features.

QUALITY SOURCED
LUMBER

High-quality cabinets standard requires the use of carefully selected top-grade lumber, ensuring the finest and most dependable kitchen cabinets. To meet this requirement, a cabinetry company must implement a rigorous inspection process to assure that only first-class products are built.

FULLY-ASSEMBLED
CABINETS

Divine Cabinetry offers both fully-assembled and ready-to-assemble cabinets in our popular designer line, whichever is more convenient for you. The cabinets are shipped directly to you, ready-to-install. Factory construction methods join wood parts using dovetail joints, hot & cold glue, power fasteners and other industrial techniques. In this wood-to-wood construction, the pieces bond on a microscopic level, creating a quality kitchen cabinet with strength.

QUALITY
CABINET BOXES

Captured and integrated brace construction creates a quality cabinet box. This increases stability during shipping and installation and provides long-term cabinet strength. Unless integrated with the cabinet side, gussets add no strength or structural integrity to the cabinet. Captured, or integrated, braces also make base cabinets much easier to move into position when installing. This integrated construction style provides great strength and stability, especially when moving and installing cabinets.

BEAUTY OF REAL
WOOD CABINETRY

Maple is a strong, fine-grained wood this is mainly off-white in color, although it may contain light hues of yellow-brown or pink. It may also contain natural imperfections which add character and uniqueness to the wood. The craftsmanship of these cabinets is really in the beauty that they give to a home. With a ten step process, the quality is sure to shine. You can be confident that your new cabinets will stand up to everyday use.

LONG-LASTING QUALITY
CABINET FRAMES

Long-lasting, quality cabinet frames provide stability. Face frames keep the cabinet box square during shipping and installation. Professional cabinet installers often charge more to install frameless cabinets, because it is more time-consuming. This is because frameless cabinetry requires very precise installation. Solid hardwood is unique in its color, texture, and grain patterns. This includes mineral streaks and knots. These natural variations add to hardwood's distinctive appeal and beauty. Hardwood is durable, resilient, and easy to repair.

DURABLE FULL-HEIGHT PLYWOOD BACK PANEL

For strength and ease of installation, quality kitchen cabinets have a durable, full-height back panel. A full back panel allows the cabinet to be directly attached to wall studs at any point on the cabinet back. If installation requires the cabinet be cut around ductwork, plumbing or electrical, the modification will be simpler on the full back. The back is secured with hot glue, nails and a rabbet joint. Extending the panel from the top of the cabinet to the bottom eliminates gaps or spaces and provides additional strength.

SOFT-CLOSE DOOR HINGES

All of Divine Cabinets have soft-close door hinges. This means they have been tested to withstand 65 pounds of weight and operated through 25,000 open and close cycles. Divine provides a limited lifetime warranty on all door hinges. Divine cabinets feature Germany softclose hinges. They are 6-way adjustable, concealed, nickel plated steel, with a 107 degree opening. They have a limited lifetime warranty.

TOEKICK

The toekick area is the space where the cabinet meets the floor. It provides space for your feet when standing at the counter. Divine Cabinetry use fully-captured dado joints, hot glue and more to create the strongest base for heavy countertops.

A decorative panel applied post-construction provides a finished look. After installation, applying a finished toekick panel completes the look.

A quality kitchen cabinet with a solid, full-length plywood back panel and plywood cabinet sides forms a natural toekick panel.

DOVETAIL DRAWER BOX CONSTRUCTION

Divine Cabinetry knows the bottom of the drawer must support the weight of the drawer contents.

Hardwood drawer boxes with dovetail joints have become the standard for premium quality cabinetry. This is due to the long-lasting strength, durability and beauty of the dovetail joint. A strong plywood drawer bottom is glued and nailed in place. Every drawer bottom is fully captured on all four sides in grooved joints.

Divine feature Germany soft-close hinges. They are 6-way adjustable, concealed, nickel plated steel, with a 107 degree opening. They have a limited lifetime warranty.

SOFT-CLOSE DRAWER GLIDES

Divine assures you that our products have been tested for quality. Each drawer glide can withstand 15 pounds per square foot of drawer space. They can also be operated through 25,000 open and close cycles. Divine provides a limited lifetime warranty on drawer glides. Divine features full-access, soft-close steel undermount guides. The ball-bearing glide is concealed beneath the drawer box supporting up to 100 lbs. The glide uses a dampening system that is almost silent when opening and closing your drawer.

THE FINEST FURNITURE FINISHES

THE FINEST MAPLE WOOD is sanded until smooth and vacuumed.

AN EQUALIZER STAIN is applied to balance the base color of the wood.

A TONER is applied to establish color uniformity.

A DEEP PENERATING STAIN is then applied to reveal the hidden beauty of the natural grain.

ALL STAINED SURFACES are then hand-rubbed and wiped if excess stain, and then slowly air-dried.

A WOOD SEALER is then applied, penetrating all exposed wood surfaces for unifor protection.

ALL SURFACE are then hand-sanded, providing a smooth, consistent surface.

A GLAZE is spplied by hand (if applicable).

A COLOR CONSISTENCY EXAMINATION is performed with additional touch-up if needed.

A FINAL PROTECTIVE TOP COAT is applied, maximizing resistance to scuffing, moisture, fading and most household chemicals.

LIMITED 5-YEAR WARRANTY

Divine Cabinetry warrants its Designer Series products to be free from defects in material or workmanship for a period of five years. Divine Cabinetry at their choice, may elect to repair or replace any Divine Cabinetry product covered by this warranty.

This warranty does not apply where items have been improperly stored or improperly installed. This warranty does not cover the following: costs of removing warranted material or the installation of replacement material, natural variations and aging inherent in wood, normal wear and tear or damage/defects caused by misuse, abuse, negligence or modification in any way. This warranty does not apply to products purchased without finish.

Divine Cabinetry reserves the right to inspect claimed defective products. No returns, replacements or repairs may be made without prior written consent. Some replacement parts may vary from those originally supplied and are subject to availability.

This warranty is the sole warranty of Divine Cabinetry and in lieu of all other warranties, express implied, including any implied warranty of merchantability and fitness for a particular use. Labor charges for removal of or installation of warranted material as well as incidental or consequential damages are excluded. We do not assume for us any other liability in connection with the sale of your product.

What is not covered by this warranty?

- The natural aging or darkening of wood color, the wood knots, the inherent growth characteristics or variation in wood. We believe this is beauty of nature and not a defect. Absolutely NO RETURN / EXCHANGE for this kind of cabinets or accessories;
- Wear and tear, damage or defects cause by misuse, abuse, negligence, alteration, nonresidential use, storage, or use in non-controlled environment (Recommended 35%-55% humidity, temperature range 17-24°
- Having a heating vent under or in front of cabinets
- Any product used or installed in connection with our products
- This warrants in not qualify for the final sales, clearance sales

Special Door Considerations:

The purchaser agrees to let doors that we warped or have panel shrinkage a 4/1" or less to hang for one season (spring) before replacement is requested. Typically a door will return to its normal position once it is acclimated to temperature and humidity conditions. Prior to requesting a replacement for a door, please be sure the door has been installed properly.

To file a claim on this warranty contact your local authorized Divine Cabinetry dealer.
