Features & Benefits

We Exceed
The
Standard!

CARB Phase 2 Certified

- Air Quality Is Vital
- Formaldehyde is a respiratory Irritant
- CARB 2 Certification means that customers with such diseases as Asthma, Emphysema or general breathing difficulties ARE PROTECTED!

CARB 2 is a regulation created by the California Air Resources Board (CARB).

The board created this as a way to prevent formaldehyde from being released into the air and reducing the air quality. If your product has a CARB Phase 2 compliant seal, you know it adheres to the standards of this regulation process.

Specs

Premium Materials & Construction

Drawer bottoms - $\frac{3}{8}$ " thick multi-ply plywood.

Specs

*Premium
Materials &
Construction*

Drawer bottoms - $\frac{3}{8}$ " thick multi-ply plywood.

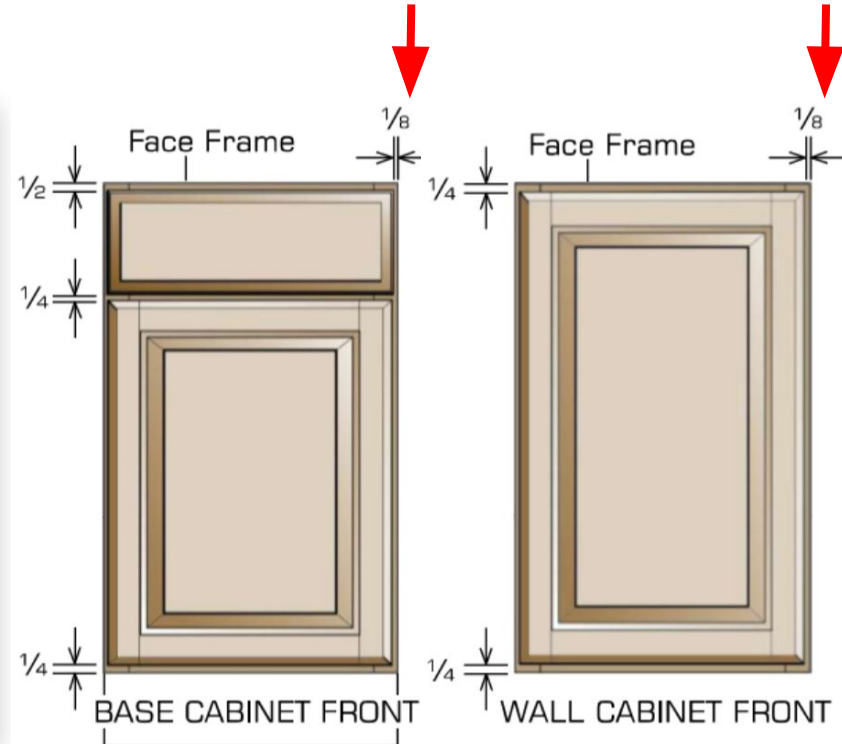

Specs

True full overlay doors – face frame reveal is $\frac{1}{8}$ " on the sides – most imports have $\frac{1}{4}$ " face frame reveal.

This means 50% less spacing between door and drawer fronts when two cabinets are placed side by side.

True full overlay doors

Specs

Drawer Box

*Most companies use
finger jointed rubber
wood - We use clear
Birch*

No Finger Joints in drawer Box

Specs

*Solid wood
construction*

- Real wood Natural Birch interior - many companies use a paper finish over their plywood Interior.
- Brushed Nickel Shelf Clips

Specs

*Premium
Materials &
Construction*

Nickel Shelf Supports - Not Plastic

Features & Benefits

Our adjustable shelves exceed industry standards

Adjustable shelves exceed industry standards with:

- Base Shelves **18" depth** – most imports are 12" deep
- Shelves are **$\frac{3}{4}$ " thick multi-ply hardwood plywood with edge banding on all 4 edges** – most imports are edge banded on front and back edge only

Features & Benefits

*Metal Corner
Supports*

Metal Corner Supports

Far Superior to wood
or plastic!

Specs

Quality Door Design

- Solid Wood Door Frame
- All recessed panel doors
Are reversed raised panel construction – center panel is
- ½” thick (this is a mark of craftsmanship – most imports have ¼” thick center panels).
- Center panels on painted cabinets are HDF (High density fiberboard)
- Center panels on stained doors are solid wood

Features & Benefits

*Exceeding
standards &
expectations*

- Concealed soft closing hinges with 110 degree opening.
- Soft-Closing Undermount Full Extension Drawer Glides.
- Paint finishes are based 2K (Conversion) polyurethane- Mohawk makes our touch up aerosols. Here is a quote from our Mohawk rep:

“I know of no better painted cabinet finish in the world than 2K polyurethane”.
- Stained finishes are water based
