#### **SAFETY WARNING**

BDS Suspension Co. recommends this system be installed by a professional technician. In addition to these instructions, professional knowledge of disassembly/ reassembly procedures and post installation checks must be known.

## **INSTALLATION INSTRUCTIONS**

- 1. Park vehicle on clean, flat, and level surface. Block rear wheels for safety.
- 2. Raise front of vehicle and support frame with jackstands.
- 3. Disconnect upper shock mounting hardware.
- Disconnect 3 nuts from upper shock tower and remove bracket. (Fig. 1)

#### FIGURE 1

- 5. Remove lower shock bolt and remove shock.
- 6. Lower axle and allow spring to be removed, it may be necessary to disconnect the sway bar and track bar.
- 7. Remove shock tower ring, install new ring with longer studs. Ensure that rubber isolator is on top of springs. Reinstall spring.
- 8. Reinstall shock inside spring with OE hardware. This shock must be installed to limit droop while vehicle is hanging after installation is complete.
- 9. Hold bracket (01226B/01227B) with plate located towards front of truck next to original shock tower mount. Trim fenderwell to allow for plate clearance. (Fig. 1/2)
- 10. Install bracket and shock tower with plate located towards front of truck with new 3/8" hardware and Loc-tite. (Fig 2)

122614 Box Kit		
Part #	Qty	Description
01263	2	Shock Bolt Ring
02238	1	Lower Mount Bracket - Drv
02239	1	Lower Mount Bracket - Pass
01226B	1	Upper Mount Plate - Drv
01227B	1	Upper Mount Plate - Pass
01282B	1	Dual Shock Tube - Pass
01283B	1	Dual Shock Tube - Drv
03514	1	Dual Shock Brace - Drv
03515	1	Dual Shock Brace - Pass
SB34BK	8	Shock Bushing
74	8	.75 x .090 x 1.47 Shock Sleeve
68	2	.875 x .156 x 3.13 Frame Crush Sleeve
75	8	1.25 x 5/16 x .50 Shock Spacer
76	2	1.25 x .125 Tapered Cut Sleeve
01247	2	Washer
342701	1	Loctite
407	1	Bolt Pack - Dual Shock Brace
	8	3/8" USS washer
	4	7/16"-14 x 1-1/4" bolt
	4	7/16"-14 prevailing torque nut
623	1	Bolt Pack
	6	9/16"-12 x 5" bolt
	6	9/16"-12 prevailing torque nut
	10	9/16" SAE flat washeR
	4	7/16"-14 x 1-1/4" bolt
	4	7/16"-14 prevailing torque nut
	8	7/16" SAE flat washer
	4	1/2"-13 x 1-1/2" bolt 1/2" SAE washer
	2	1/2 SAE washer 1/2"-13 prevailing torque nut
	6	3/8"-16 serrated flange nut
	<u> </u>	s/o roserated hunge hut

#### **FIGURE 2**

11. Install shock hoop to OE slot shown in Figure 3 with 9/16" x 5" bolt and 9/16" SAE washer.

#### **FIGURE 3**

12. Loosely install the dual shock brace to the front of the top mounting location with a "x 1-1/2" bolt into the tube and another 1/2" bolt with torque nut through other hole (Fig 4). The brace will mount to the front of the coil bucket.

13. Lightly tighten the dual shock brace so that the two holes can be marked on the coil bucket to be drilled out. (Fig 5A) Mark the location of the two holes on the front of the coil bucket. Remove the brace and drill the two holes out to 1/2". (Fig 5B)

#### **FIGURE 5A**

#### **FIGURE 5B**

- 14. Reinstall the brace to the upper mount with the 1/2" hardware. Attach to the coil bucket with the provided 7/16" bolt, 7/16" nut, and 3/8" USS washers in bolt pack 407. Run the bolts from the inside of the coil bucket outwards towards the front of the truck. Leave hardware loose.
- 15. Install sleeve onto bolt from inside frame rail. Ensure that sleeve is centered between slot. (Fig 6).

IMPORTANT: This will keep the end of the tube from sliding around. Install tapered sleeve, 3/16" thick washer, and torque nut.

**FIGURE 6** 

16. Tighten bolts in the following order. Torque 9/16" bolts to 110 ft-lbs, shock tower hardware 35 ft-lbs, 1/2" bolts 75 ft-lbs, and 7/16" bolts to 50 ft-lbs. (Fig 7)

**FIGURE 7** 

17. Remove the upper control arm bolt and reinstall with the dual shock bracket. Align bracket so that the back edge is parallel with the upper control arm pocket. Mark center of holes, remove bracket, drill holes to 7/16". (Fig. 8)

#### **FIGURE 8**

18. Install bracket with new 7/16" x 1-1/4" bolts, washers and nuts with the 9/16" bolt that comes in the BDS long arm kit. (Fig 9) Note: Brakeline must be mounted into the stock location as shown. This will require a longer than factory brake line (not included in this kit).

**FIGURE 9** 

- 19. Torque 9/16" hardware to 95 ft-lbs and 7/16" hardware to 50 ft-lbs.
- 20. Grease and install SB34 bushings into each end of all of the shocks. These bushings come in the box kit with brackets. Do not use bushings that come in the shock box.
- 21. Install 74-1 Sleeves (rolled sleeve) into all shock bushings.
- 22. Attach shocks to upper mounting hardware with 75-1 sleeves on each side of mounting bracket. (Fig. 10) Fox 2.0 shocks will mount body up and BDS series shocks will mount body down.

#### **FIGURE 10**

23. Attach shock lower mounting point the same as above. Run bolt from back to front. (Fig. 10/11) *Note: It may be necessary to index the coil slightly to gain clearance, or trim excess from tip of bolt.* 

- 24. Attach top of shock (inside coil) to shock tower. Tighten until bushings begin to swell.
- 25. Torque 9/16" shock mounting bolts to 95 ft-lbs.
- 26. If sway bar and trackbar were disconnect, reattach and torque to proper specifications.
- 27. Cycle steering and check for interference. 4.5"-5" backspaced wheels must be used with this kit. Stock tires and wheels may rub the rear shock. The turning radius may need to be limited to eliminate interference.
- 28. Recheck all fasteners for proper torque, check again after 500 miles, and at regularly scheduled maintenance intervals.

### WE WANT TO SEE YOUR RIDE!

Grab photos of your BDS-equipped truck in action and send them in for a chance to be featured. Send it in to our Bad Ass Rides customer gallery at bds-suspension.com/bar and post them on the BDS Fan Page on Facebook at facebook.com/BDSSuspensions. Don't forget about your BDS swag! BDS offers t-shirts, hoodies, decals and more available on the BDS website or through your local BDS distributor.

## <u>TIME TO HAVE SOME FUN</u>

## Thank you for choosing BDS Suspension.

For questions, technical support and warranty issues relating to this BDS Suspension product, please contact your distributor/installer before contacting BDS Suspension directly.
