CAREER

FRONT END DEVELOPER

STITCHED | LDN, UK

MAY 19 - AUG 21

Stitched is an eco-friendly online curtain + blind retail start-up with a focus on 3D visualisation and AR. :: stitched.co.uk

- Built and deployed front-end changes for a site redesign that involved custom reusable CMS components.
 - Built the front-end using Elixir / Phoenix LiveView, JS / React, SCSS, HTML/embedded Elixir, and Git for version control.
 - Experience with Kanban methodology, CI / CD (Google Cloud and Docker then Kubernetes).
 - Exposed to Ruby / Ruby on Rails and Redux.
 - Experience with unit and integration testing.
 - Pair programmed with senior back-end and full-stack engineers.
 - Worked closely with the UX/UI designer to implement designs created on Figma, as well as collaborating to find ways to improve user experience.
 - Approached designs with a mobile-first and responsive methodology.
 - Approached features with a focus on maintainable and reusable code.
-
- Built the front-end of an AR app using Swift / SwiftUI :: [Stitched AR](#)

FRONT END DEVELOPER

PORTFOLIO | PERSONAL

NOV 21 - CURRENT

Designed and built a personal portfolio. :: garyunyoung.com :: [view code](#)

- Built using React, TypeScript, SCSS, and Git. Deployed on Heroku.
- Designed and developed with accessibility (a11y) in mind.

FRONT END DEVELOPER

THE BETHS | FREELANCE

APR 19 - CURRENT

Designed and built a website for the Beths. :: thebeths.com :: [view code](#)

- Built using Next.js, Sanity.io, SCSS, and Git. Deployed on Heroku.
- Implemented with Sanity.io - an open-source, API-based, CMS.
- Integrated Google Analytics using Google Tag Manager.
- Added a GDPR banner that enables/disables analytics.
