## Collage

13TH BEACH - 9 Boings

This trend involves a collage of different colours and patterns that come together in furnishings to provide an eccentric take on interior design. Drawing from the subtle beauty of soft pastels and the bold richness of bright mid-tones, eclectic collage integrates a handcrafted, artistic approach to interior design.

Succeeding in projecting this trend into your space is the use of patterns along with contrasting colours in unusual combinations. Trial with collages of different textures and patterns, combining ditsy botanical outlines with bold geometric patterns. Textiles offer the opportunity to enhance this trend through embroidery, quilting, and patchwork.
