New Warehouse

FOR A GROWING BUSINESS

Shiny Drive
Truganina

A growth business needs a warehouse facility that can meet its requirements well into the future, and the newly built GH Commercial warehouse in Truganina does just that.

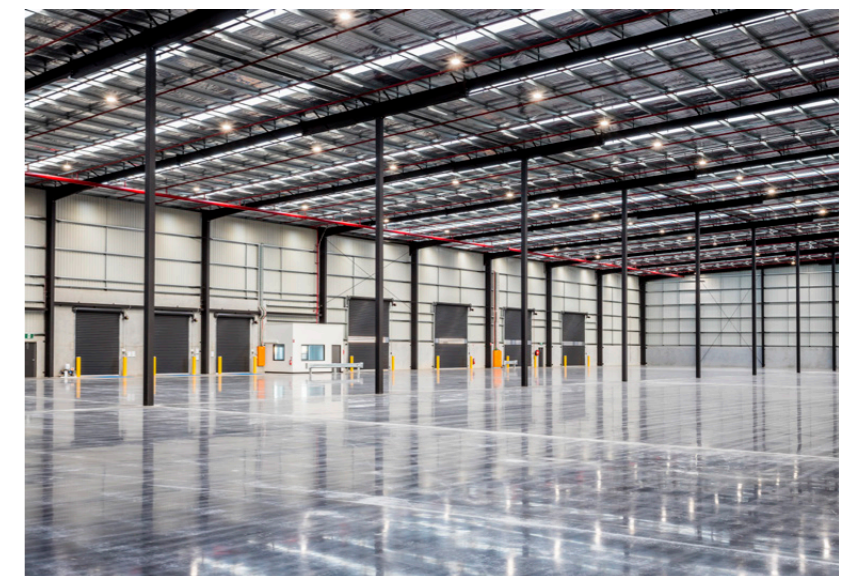

Located in the appropriately named Shiny Drive, this state-of-the-art facility commenced construction in April 2019 and was completed mid 2020.

The Shiny Drive warehouse is a centralised distribution centre that has consolidated all the palletised goods previously housed at two facilities in Laverton and an additional three smaller complexes. Designed for maximum efficiency, the new facility is a whopping 14,402 square metres in size, storing over one million metres of our best selling commercial products, including Carpet Tiles, Carpet Planks, Laminate, Vinyl Planks, Timber and Hybrid flooring.

From picking and dispatch, to enabling speedy order turnaround times and improving overall inventory management, the wholly integrated and vastly increased capacity of the new warehouse streamlines all our processes, while a dedicated customer pick-up point offers convenience and flexibility for local client orders. Quicker turnaround times from order placement to dispatch is also ideal for any project with a short lead time or strict time constraints, helping to avoid unnecessary scheduling delays.

As an expanding Australian organisation, GH Commercial is especially proud to not only operate on Australian soil, but support local manufacturing production in Geelong. Our focus has always firmly centred on delivering the best possible experience for our customers, incorporating innovative technologies and improved systems wherever we can.

GH Commercial remain committed to exceptional service and product quality - Why not visit www.ghcommercial.com to see just how extensive our range of carpet tiles and planks is for yourself?
