Enviro Bac Plus®

Acoustics play a significant role in an interior environment. Background noise, particularly in open plan spaces, can affect concentration, stress levels and ultimately productivity. Carpet tiles and planks with Enviro Bac Plus® cushion backing have a Noise Reduction Coefficient (NRC) 66% greater on average when compared to standard Enviro Bac® carpet tiles. Enviro Bac Plus® contains approximately 75% recycled content (recycled material is a mixture of pre- and post-consumer material).

1. Yarn
2. Primary Backing
3. Pre-Coat
4. Enviro Bac Plus® Cushion Back
5. Secondary Scrim

Features

- Our most premium cushion backing option for overall thickness and density
- Enhanced acoustic properties
- Prolonged life expectancy of the carpet tile
- Greater comfort underfoot
- Eligible for take back at the end of their life under our GH Commercial Recover Program.
- Enviro Bac Plus® contains approximately 75% recycled content (recycled material is a mixture of pre- and postconsumer material)
- Same installation method and adhesive spread rates as standard backed carpet tiles
- Reduces telegraphing on poor subfloors to reduce preparation costs
- Can be installed over existing pressure sensitive adhesive (pending suitable tack)
- Available option for all Australian Made carpet tiles – some minimum requirements and lead times may apply
- Increases minimum NRC (16oz tiles) to 0.25§
