# Visitor Origin

A map of the top 75% of Block Groups (BGs) based on total visits to the selected location.

This is calculated by sorting all BGs high-to-low based on total visits. Those with a cumulative sum less than 75% of the total are shaded. Unique devices may make multiple visits.

A Block Group is the smallest geographical unit for which the U.S. Census Bureau publishes data. Typically, Block Groups have a population of 600 to 3,000 people.

# Most Trips

This map shows the 75% Trade Area for the location with a gradient color scale to better identify geographies that have higher and lower visitation counts.
