

Keto-Handler Plus Thermoplastic Elastomer (TPE), Powder-Free, Industrial-Grade, Clear, 2-Mil, Lightweight, Smooth Finish, 10-Inch Disposable Gloves - LIMITED STOCK

Description

The Disposable Keto-Handler Plus TPE gloves are an unbelievably lightweight choice as compared to vinyl, nitrile, and rubber latex disposable gloves. Additionally, these gloves provide chemical resistance, are 2-mil, powder-free, keto-handling, and made from 100% Thermoplastic Elastomer (TPE). They offer excellent dexterity, chemical resistance, and performance without containing latex proteins. In addition to impressive degradation testing results for ketone handling, TPE disposable gloves offer elasticity and stretch compared to PE (LDPE-HDPE) gloves, which do not stretch.

Features

- Component materials comply with FDA regulations for food contact
- Made with clear thermoplastic elastomer (TPE) material
- Smooth finish for good dry grip
- Powder-free
- Not for medical use
- 2-mil thickness
- 10 inches in length
- Ambidextrous
- Tactile dexterity
- Not made with natural rubber latex
- AQL 2.5
- 200 gloves per dispenser, 10 dispensers per case
- Sold by the case

ITEM **8600PF**

SIZES **S, XL-2XL**
