

Butyl 878

Superior resistance to highly corrosive acids and chemicals

A thin and lightweight glove offering a "second skin" feeling with a high level of chemical protection. Ideal for those working with biohazards and specifically when handling ketones, amines and esters. The Butyl rubber provides the highest permeation resistance to toxic gases and water vapours.

Features

- ▲ Impermeable for working in damp or greasy environments
- ▲ Protection against ketones, alcohols, nerve agents
- ▲ Provides the highest permeation resistance to gases and water vapours of any protective material used to make gloves
- ▲ Unlined to reduce risk of lint contamination
- ▲ Smooth finish
- ▲ Length: 35cm
- ▲ Thickness: 0.70mm
- ▲ Rolled cuff

Certifications
