

Lens Gray Anti-Fog

Frame Gray with Blue

Description

The Riley® Stream™ Evo Eco is the first safety glass to the market that doesn't contain single use plastic. These glasses redefine eye protection with a sleek, frameless sports-style design engineered for industrial environments. Weighing just 23g, this ultra-lightweight safety spectacle delivers all-day comfort without compromising on durability or protection. Featuring a single 9.5-base wraparound polycarbonate lens, the Stream™ Evo Eco provides a wide field of vision and effective lateral protection. These lenses are treated with Arida 400, UV400, and Moisture Repellent coatings, offering superior anti-scratch and anti-fog performance for clear visibility in demanding conditions. Comfort and fit are prioritized with a soft, adjustable rubber nose bridge and co-injected, bi-color thermoplastic rubber temples that flex to ensure a secure, anti-slip fit. Slim, metal-free temple arms are specially designed for compatibility with ear defenders, making these glasses ideal for high-noise environments. Fully metal-free, these are safe for electrical applications and reduce interference in sensitive work areas.

Each pair is supplied with a microfiber storage pouch.
