Services: Design, Specification,
and Installation

Description

Jason Roberts Services was contracted to take an existing space in a office complex and provide a seamless decorative floor finish utilizing the existing concrete floor. The team at JRS designed a grind, dye and polish system to meet the design of the architect and the needs of the owner. This project consist of carpet and mastic removal, Several stages of Diamatic grinding to achieve a flat smooth surface, Dye process to achieve a translucent yet vibrant color tone, Polishing, and a mat finish penetrating sealer.
