# HYPHEN WALLET™

HYPHEN FOR BUILDERS™

Real-Time Payment Management System

Hyphen Wallet automates accounts payable for Builders with its innovative payment solution. Hyphen Wallet increases efficiencies by reducing the cost and time of processing payments to Suppliers and Trades, increases transaction security and retains high-quality Suppliers and Trades by getting them paid faster.

FEATURES

- Automate of AP Processes with seamless ERP integrations
- Auto reconcile accounts and transactions
- Increase security of payments
- Increase efficiencies by reducing time and cost of payments
- 100% paperless
- Provide Suppliers more ways to get paid. Ultimately, paying them faster
- Increase Supplier satisfaction
- Your Suppliers receive 24/7 accessibility into funds and status of payments

Gain Visibility Into Payments and Invoices

With Hyphen Wallet, Home Builders gain insight into every payment executed to their Trades by updating their back-office ERP with real-time payment status. Hyphen Wallet also provides Suppliers the ability to view payment reports and download them into Excel or PDF for further analysis using the Hyphen Wallet Portal.

Real-Time Data Flow

Instant reconciliation within Hyphen Wallet ensures a fast and accurate financial close cycle, improves cash flow visibility and working capital management and reduces potential fraudulent payouts. Hyphen Wallet combines payment methods, currencies, subsidiaries and regions using payment integration that's real-time with 24/7 service.

Automation Saves Time

Automation works to improve the payment process between Builders and Trades, making it easy for the Builder to check records, track past and present expenses and identify fraudulent charges much faster. Reduce invoice processing time by over 80% and invoice errors by 23%.

Reduce Fraud and Increase Security

Having visibility into all transactions by both the Builder and the Supplier/Trade, payments can be verified and tracked throughout the payment process. Moving to an automated payment platform reduces the possibility of error by fraud or lost checks in the mail. Replace risk and fraudulent activity with enhanced security.
