

**2022**

**GREENHOUSE GAS REPORT**

**Dotdash  
meredith**

Dotdash Meredith is the largest digital and print publisher in America. From mobile to magazines, nearly 200 million people trust us to help them make decisions, take action, and find inspiration. Dotdash Meredith's over 40 iconic brands include PEOPLE, Better Homes & Gardens, Verywell, FOOD & WINE, The Spruce, Allrecipes, Byrdie, REAL SIMPLE, Investopedia, and Southern Living. Dotdash Meredith is based in New York City and is an operating business of IAC (NASDAQ: IAC).

# 2022 EMISSIONS

## Emissions

2022	MT CO <sub>2</sub> e
Scope 1: Direct	2,826
Scope 2: Indirect	7,935
<b>TOTAL</b>	<b>10,761</b>

## Scope 1: Direct

DIRECT EMISSIONS	MT CO <sub>2</sub> e
Mobile Source	2,422
Heat	403
Refrigerant	1
<b>TOTAL</b>	<b>2,826</b>

## Scope 2: Indirect

INDIRECT EMISSIONS	MT CO <sub>2</sub> e
Electricity	7,093
Heat	842
<b>TOTAL</b>	<b>7,935</b>

Reported Scope 2 emissions are location-based;  
Heat in Scope 1 is for owned facilities and in Scope 2 for leased facilities.

# What are the boundaries for our GHG emissions inventory?

## **Organizational**

Reflects emissions generated by Dotdash Meredith.

## **Operational**

Dotdash Meredith used the Operational Control Approach. Operational Control means that Dotdash Meredith has full authority to introduce and implement its policies at the operation.

## Scope 1: Direct

CORE EMISSION	SOURCE	GREENHOUSE GAS
Mobile Source - Gasoline	Owned Vehicles, Corporate Aircraft	CO <sub>2</sub> , CH <sub>4</sub> , N <sub>2</sub> O
Heat - Natural Gas (Owned facilities)	Boilers, Water Heaters, Generators	CO <sub>2</sub> , CH <sub>4</sub> , N <sub>2</sub> O
Refrigerant	Owned Vehicles	HFC-134a

## Scope 2: Indirect

CORE EMISSION	SOURCE	GREENHOUSE GAS
Electricity	Facility Lighting, HVAC	CO <sub>2</sub> , CH <sub>4</sub> , N <sub>2</sub> O
Heat - Natural Gas (Leased facilities)	Boilers, Water Heaters, Generators	CO <sub>2</sub> , CH <sub>4</sub> , N <sub>2</sub> O

## Emissions by Greenhouse Gas

GAS	METRIC TONS	PERCENT
CO <sub>2</sub>	10,700	49
CH <sub>4</sub>	14	0
N <sub>2</sub> O	46	0
HFC-134a	1	0
PFC	N/A	N/A
SF <sub>6</sub>	N/A	N/A

# What is our quantification methodology?

---

## **Emission Factors**

Direct emissions (Scope 1) from mobile sources were calculated by applying the most current EPA emission factors to fuel purchased during the period. Emissions also include refrigerant leakage from fleet vehicles. Heating emissions (from owned facilities) were calculated by applying the most current EPA emission factors to natural gas consumed during the period.

Indirect emissions (Scope 2) from purchased electricity were calculated by applying the most current EPA emission factors to electricity consumed during the period. International locations applied the IEA International Electricity Factors, or in some cases country-specific emission factors. Heating emissions (from leased facilities) were calculated by applying the most current EPA emission factors to natural gas consumed during the period.

## **Energy Intensity Factors**

Energy Intensity Factors are from the most recent *Commercial Buildings Energy Consumption Survey*.

## **Global Warming Potential**

100-year global warming potentials are from the most recent IPCC Assessment Report.

# How often do we expect to report and adjust reporting methodology?

---

GHG Emission Inventory reporting is expected to occur **annually**, covering the previous calendar year.

Changes will be made to **calculations** and **emissions factors** only if justified by regulatory changes, scientific and engineering judgment, or if the EPA or GHG Protocol guidance is updated.

# What is our audit and verification process?

---

## **Internal Review**

IAC's Inventory Management Plan is used to ensure that Dotdash Meredith's Greenhouse Gas (GHG) Inventory is in compliance with current protocols and guidance.

## **External Auditing**

IAC's 2022 GHG Inventory was verified by Advanced Waste Management Systems, Inc. (AWM), to the level of limited assurance, which included Dotdash Meredith's GHG Inventory. AWM is accredited by the ANSI National Accreditation Board.

# Transparency

---

This 2022 GHG Report focuses on Dotdash Meredith’s ESG emissions and related operations of its owned and operated businesses from January 1, 2022 through December 31, 2022 (and excludes the operations and performance of its suppliers or contractors). This report uses qualitative descriptions and quantitative metrics to describe Dotdash Meredith’s GHG emissions and related policies, practices and methodologies. Qualitative metrics used in this report continue to evolve and are based on the assumptions of management and/or certain third parties believed to be reasonable, but they should not be considered guarantees.

The information and opinions contained in this report are provided as of the date of such report and are subject to change without notice. Dotdash Meredith does not undertake to update or revise any such statements. In this report, Dotdash Meredith is using the term “significant” for purposes of identifying the threshold at which adjustments and/or corrections to its reported ESG emissions may be required (not as defined for the purposes of financial and SEC reporting in the US).

This report contains certain forward-looking statements relating to Dotdash Meredith’s GHG emissions reporting that are based on management’s current expectations. Therefore, the actual conduct of our activities, including the development, implementation, or continuation of any program, policy, or initiative discussed or forecasted in this report may differ materially in the future.
