

AN ELEGANT, COZY AND MODERN FAMILY HOME OVERLOOKING A LAKE

Maestri Studio has renovated this house with modern finishes, works of art and a touch of color achieving an original and attractive style.

Elegant and cozy. This is this house designed by the **Maestri Studio** architecture studio in **Texas, United States**, for a young family that wanted to adapt their new house to their tastes and needs, looking for a modern and warm home with an original and different aesthetic. The residence, which had belonged to a Miss Texas, is **located in front of a lake**, offering stunning views of nature, which was the main attraction for customers. When the Maestri Studio team entered the house for the first time, they could see the potential it had, even though it was outdated after several years in disuse. It was a challenge for the studio that reorganized the spaces and renovated them getting an **elegant and glamorous home for the family**.

They designed a new dining room for breakfast, the kitchen, the bathrooms and updated all the finishes of the house. They decided to keep some original elements such as the fireplace between the dining room and the living room or the spiral staircase of the library. As for the color palette, they chose **black and white with touches of other bolder tones**, providing a fun and cheerful air. For the decoration, the designers were inspired by Japanese architecture, with clean finishes, art and color in the furniture. In addition, they wanted to enhance the views of the lake, giving it prominence. Art also appears throughout the house, with **colorful and cheerful works**, among which a Star Wars collection in the library and in the games room stands out. The result is a **fun house with a relaxed, cozy and sophisticated atmosphere**.
