

Loading kit

The simple loading solution

- Price-efficient
- Simple and quick assembly
- No surface protection mat required

A loading kit...

includes 2 aluminium profiles with special EPDM-profiles. The profiles are unfolded at right angle to the support, fastened with one bolt each and loaded with concrete corner stones or the like. The special EPDM-profile evenly distributes the loads onto the roof cladding. A surface protection mat is not required. Please make sure that the roof cladding is compatible with our EPDM profile.

Technical data

Material	Profile made of aluminium, the lower part is a special EPDM-profile, fastening elements made of VA 1.4301 or at least the same quality
Planning aid	Configuration and structural dimensioning with the AutoCalculator Easy and the Schletter Configurator.
Structural analysis	Structural analysis in accordance with current national standards (in Germany DIN EN 1991, EC1).
Application	As a loading solution for solar plants on flat roofs
