

Your advantages

AC•THOR

- Easy installation
- Plug in like a household appliance
- Heating power is linearly controlled
- Maximizes self-consumption

Also compatible
with many battery
systems

AC ELWA-E

- Installation in hot water or storage tank
- Heating power is linearly controlled
- Maximizes self-consumption

ELWA

- Connection to power grid is not necessary
- Patented boost backup for bad weather conditions
- 100 % hot water without additional heat sources in summer
- Lower operating costs

Why my-PV?

Because customer satisfaction is our top priority.

Because we are market leader in photovoltaic hot water preparation.

Because we have more than 25 years experience with renewable energy.

Because we stand for idealism, innovative spirit and professionalism.

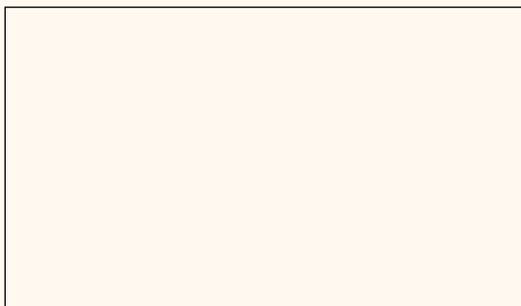

Because we offer versatile solutions.

Because we are an Austrian company.

Because we are internationally successful.

Because we are constantly evolving.

Electricity

How I get
more from my
photovoltaic system

www.my-pv.com

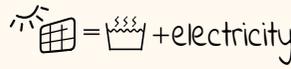

Do you want to generate and use electricity yourself?

We show you the easiest way.

Yes, I already have a photovoltaic system.

I would like to use my self-generated photovoltaic electricity optimally for myself - for household electricity and hot water.

Yes, I have an immersion heater.

No, I don't have a photovoltaic system yet, but I would like to have one.

I want to use all my photovoltaic energy for hot water.

No, I don't have an immersion heater.

The solution is obvious ...

AC·THOR, my photovoltaic Power Manager for hot water and heating
