safely earthed

# PVEARTHING KITS

## Potential equalisation of PV material

RoofSupport earthing kits are used in accordance with HD-IEC60364 for the potential equalisation of PV material in the earthing system of a building or object. UV-resistant wire based on various terminals and/or tinned copper cable lug.

### WHY PV EARTHING KITS?

- Dissipate current leakage.
- Dissipate lightning currents.
- Keeps inverter working properly.
- Eliminate voltage differences.
- Prevent high voltages dangerous to the touch.
