HEAT TRANSFER VINYLS

BRITELINE | POLI-TAPE

CROSS-REFERENCE & PRODUCT GUIDE

TRUSTED IN AMERICA

Dear partner, dear valued customer,

We are excited to share with you the next chapter of the **Briteline Heat Transfer Vinyl journey at Grimco**. For many years, **Briteline G-Flex Plus** and **Briteline G-Flex Turbo** have been trusted products for decorators across the industry. Today, Grimco is proud to reveal the worldwide leader **behind Briteline HTV products: POLI-TAPE®**, the German manufacturer globally recognized for its expertise in premium heat transfer vinyl.

As part of this evolution, **Briteline G-Flex Turbo** and **POLI-FLEX® TURBO** are the **exact same product**, manufactured in Germany by POLI-TAPE. This means you can expect the same trusted performance, application characteristics, and reliability you already know.

This guide has been created to help make the transition simple and seamless. Inside, you will find clear **color and product cross-references** between Briteline and POLI-FLEX® ranges, allowing you to easily navigate between the previous Briteline references and the corresponding POLI-TAPE products.

In addition, Grimco has **expanded its HTV portfolio** by introducing **all POLI-TAPE products** now available on the U.S. market. This guide therefore also serves as a product overview, giving you the opportunity to discover additional solutions designed to support your production and creativity.

Our goal is to ensure that the transition remains **smooth, transparent, and beneficial**, while continuing to provide the high-quality materials decorators rely on every day.

We invite you to explore this guide and discover how the trusted Briteline range connects to the broader POLI-TAPE® product family.

Thank you for your continued trust and partnership.

With appreciation,
Your POLI-TAPE® & Grimco Teams

POLI-FLEX® TURBO:
CRAFTED FOR CHANGE. TRUSTED TO PERFORM.

Briteline G-FLEX PLUS
Briteline G-FLEX TURBO

Today, Grimco is proud to reveal the worldwide leader **behind Briteline®** G-Flex Plus and G-Flex Turbo and HTV products: **POLI-TAPE®**, the German manufacturer recognized globally for its expertise in premium heat transfer vinyls.

Former **Briteline® G-Flex Turbo** and now **POLI-FLEX® TURBO** are the **exact same product**, manufactured by POLI-TAPE®. Same trusted quality, same performance and same application behavior you are already familiar with. To simplify and streamline the use of standard HTV colors, the core assortment is now offered under the POLI-FLEX® TURBO brand. Several key Briteline® G-Flex Plus colors, are still available within the POLI-FLEX® PREMIUM range. (cross-references starting on page 3).
In the tables below, you will find the **enhanced standard sizes offering**, along with the color **cross-references** between former Briteline® G-Flex Plus, Briteline® G-Flex Turbo, and the new POLI-FLEX® TURBO!

POLI-FLEX® TURBO:
CRAFTED FOR CHANGE. TRUSTED TO PERFORM.

Briteline G-FLEX PLUS
Briteline G-FLEX TURBO

With a huge range of **69 colors**, in different finishes, **POLI-FLEX® TURBO** ticks all the boxes on **almost all fabrics** and for all types of usages. Not only **fast to apply** and very easy to use, these HTV films are helping to **save energy** and **reduce your costs**.

While its popular use is **on standard and delicate fabrics**, due to an application at 265˚F for 5 seconds only, TURBO can also be applied at 320˚F in only 3 seconds. This will make a huge difference to your workflow.

The end users will love the **unique matte finish** of the standard colors and the **extremely durable** and high-end quality textile decoration that will maintain forever its initial color and properties, even when exposed to tough washing and drying conditions.

WHY IS TURBO THE BEST SOLUTION FOR ALL TYPES OF HEAT TRANSFER PROJECTS?

YOU HAVE A BIGGER JOB AND/OR JUST NO TIME?

POLI-FLEX® TURBO is easily and quickly weeded. And... within a minute with a heat press, you can apply **6 designs**, 3 times more than with classic flex. Over a day, these are a lot of garments you can customize!

YOUR PROJECT INVOLVES MANY DIFFERENT FABRICS?

POLI-FLEX® TURBO is suitable for most fabrics, from standard to more temperature sensitive or sublimated fabrics. With just **one product for all**, you streamline your stock, ensure you have the same color for all your designs, and you only have one setting to remember.

SCAN THIS CODE TO VISIT OUR YOUTUBE CHANNEL AND LEARN MORE!

YOU ARE CONCERNED ABOUT YOUR ENERGY CONSUMPTION?

It is just better to work at 265 °F with **POLI-FLEX® TURBO**, otherwise you would spend respectively up to 35% - 50% more energy for heating up and maintaining the press at temperature.
Save energy and money!

Want to know more about energy saving with POLI-FLEX® TURBO? SCAN THIS CODE TO LEARN MORE

YOU ARE CONCERNED ABOUT THE EFFICIENCY OF YOUR TEAM AND PROCESS?

With **POLI-FLEX® TURBO** you always have a suitable film, the standard of using the right settings, a safe and precise positioning of the designs and a faster workflow.

YOU HAVE TO WORK WITH TEMPERATURE SENSITIVE FABRICS?

POLI-FLEX® TURBO is equipped with a very fast melting adhesive that will **strongly bond in a couple of seconds at low temperature.** Thereby you prevent overheating and damaging the fabric as well as press marks.

Briteline G-Flex Plus users will continue to have access to their key colors.

Most of the other colors are available in the POLI-FLEX® TURBO range. When it comes to classical application with 320 °F / 15 seconds, POLI-FLEX® PREMIUM is clearly the benchmark.
Since 2006, it has been the go-to product for millions of users worldwide.

It is the perfect ally for garment decorators working with more standard fabrics, and the preferred option for work-wear where high temperature washability is required. Experience the Made in Germany, real matte flex film with soft touch feel.

Briteline G-FLEX STRETCH

has been discontinued and does not have a direct replacement. POLI-FLEX® TURBO is recommended as an alternative.

POLI-FLEX®
PRINTABLE RANGE

former Briteline
PRINTABLE

POLI-TAPE® offers an extensive range of printable flex films. The aim is to have a solution for every project, for every fabric. Still, it should remain very simple. The go-to product is therefore the TURBO PRINT 4046 NON-ADHESIVE as this film covers the vast majority of applications. Of course, if you prefer an adhesive liner, a more traditional adhesive, a sublistop / blockout layer or a transparent film we have these too! All these printable HTV films can be used with most standard ink types.
Discover the extensive range and benefits of each product!

TURBOPRINT is not only an ideal printable flex film, offering a huge range of benefits to the applier during the handling and application on the fabric, but also ensuring a long-term high-end quality textile decoration to the end user

265 °F

	POLITP4047			**TURBOPRINT 4047 GLOSS** is like 4046 but with a glossy finish.
	15”x10yd 15”x30yd	20”x10yd 20”x30yd	30”x30yd 60”x30yd	
	POLITP4037			**TURBO PRINT 4037 MATTE UV** is like 4036 but specifically developed for UV-curable inks.
	15”x10yd 15”x30yd	20”x10yd 20”x30yd	30”x30yd 60”x30yd	
G-FLEX BLOCKOUT PRINT 210 BLHT-210BO	**POLITP4010S**			**TURBOPRINT 4010S BLOCKOUT** is based on the TURBOPRINT 4036 film. With 4.7 mil, the film is thicker and therefore slightly less stretchy. It offers double protection with an additional blockout interlayer that resists even the worst discoloration from sublimation inks. The best solution for perfect long-term results.

POLI-FLEX® PRINTABLE RANGE

former Briteline PRINTABLE

Former briteline Part-Nr.	POLI-TAPE® Part-Nr. Exact same product	DESCRIPTION
G-FLEX ULTIMATE PRINT SUPERSOFT 233 BLHT-233MT	**POLIFP4033** 30”x30yd 60”x30yd	**FLEXPRINT 4033 SUPERTHIN** Ultra-thin 2 mil film offering high print resolution with a semi-matt finish and a soft textile feel. Ideal for larger designs where maximum flexibility is required.
	POLIFP2160 25”x28yd 50”x28yd	**FLEXPRINT 2160 SEMI GLOSS** Popular solvent printable product. FLEXPRINT 2160 is an opaque, white film with a semi-gloss to full-gloss finish.
	POLIFP2090 30”x30yd 60”x30yd	**FLEXPRINT 2090 BLOCKOUT** is a sublimation-resistant white polyurethane film with a barrier layer to prevent dye migration. Features a semi-matte finish. Another alternative is TURBOPRINT 4010S BLOCKOUT.
G-FLEX ULTIMATE PRINT NYLON 235 BLHT-235NY	**POLINP4035** 30”x30yd 60”x30yd	**NYLONPRINT 4035** Specially developed adhesive for hydrophobic, impregnated nylons and difficult textiles. With 4 mil thickness, it provides excellent opacity. Application requires a two-step process for optimal bonding (see TDS).
G-FLEX ULTIMATE PRINT TRANSPARENT 234 BLHT-234TR15030	**POLIFP4655** 30”x30yd 60”x30yd	**FLEXPRINT 4655 CLEAR** 3 mil PU film with a non-adhesive PET liner for direct transfer. Ideal for very intricate designs that are difficult to weed. Simply mirror-print on the adhesive side, cut around the design, and apply with a heat press. The film protects the print.
	POLIFP4670F 30”x10yd 30”x30yd 60”x30yd	**FLEXPRINT 4670FR FLAME RETARDANT** Produced with flame-retardant components for additional safety. Ideal for firefighters, bikers, race drivers, crews, or any workwear requiring enhanced protection.
See the video!	**POLIPP4040** 20”x10yd 20”x30yd 40”x30yd	**PUFFPRINT 4040 MATT** Printable puff film delivering excellent print quality with a soft, raised 3D effect—perfect for trendy, standout textile designs.
	POLIFPA4100 100 A4 sheets / pack	**FLEXPRINT COLOR UP** Perfect for creative hand drawing with watercolors, markers, or felt-tip pens. Also printable with desktop inkjet and laser printers. Ideal for the Craft Market: kids can draw directly on the material and apply it to a T-shirt.

ALL TRANSFER TAPES	15	30	20	10 30	30	30	60	30

Former briteline Part-Nr.	**POLI-TAPE®** Part-Nr. Exact same product	DESCRIPTION
BRITELINE 850 HTV TAPE HIGH ADHESION BLHT-T850	**POLITAPE850**	**POLI-TACK 850** is a high adhesion transfer tape. It's best used in the thermal transmission of textile transfers. POLI-TACK 850 has a high-temperature resistance to help make your application a breeze. It is great for transferring small text or finely detailed heat transfer vinyl to your fabric.
BRITELINE 853 HTV TAPE HIGH ADHESION BLHT-T853	**POLITAPE853**	**POLI-TACK 853** Its low adherence qualities make it great for thermal transmission of textile transfers. It can also be used as a protective cover given its soft and residue-free removal properties. Although it has a low adherence, it has a high-temperature resistance that supports the quality of your heat transfer application.
BRITELINE 854 HTV TAPE HIGH ADHESION BLHT-T854	**POLITAPE854**	**POLI-TACK 854** Being our top selling transfer tape, POLI-TACK 854 is engineered specifically for the application of printable heat transfer films to textiles.With a high tack and medium adhesion, this transparent tape assists in the thermal transmission of textile transfers.
	**POLITAPE870**	**POLI-TACK 870** New high-quality transfer tape for printed flex films. Suitable for most HTV applications, it ensures safe positioning. before pressing and removes cleanly afterward. For intricate or large designs, high- or low-tack alternatives are available.

POLI-FLEX® THERMAL TRANSFER TAPE

POLI-TAPE®	THERMO-TAPE 840T
POLITAPE840	This self-adhesive transparent tape with a high tack adhesive has an excellent resistance to chemicals, ageing, humidity and of course high temperature. Available in 0.35 in width, it is ideal for positioning Flock- and Flex-products with non-adhesive liners before and during thermal transfer. After usage it removes perfectly without residue.

MAKE IT SPARKLY, BRIGHT AND SHINY

We often think of sparkly films only for artistic sports, stage costumes or children's wear.
Of course, these are perfect applications for POLI-FLEX® PEARL GLITTER, but also famous clothing brands use the power of our sparkly range to enhance the impact of their designs. Add just a detail or create a complex motive with our PEARL GLITTER for a special effect thanks to the only sparkly film
100% Made in Europe,
Made in Germany.

POLI-FLEX®
REFLEX

WHEN VISIBILITY IS KEY

Health and safety regulations are very strict when it comes to work on roads, at night or in dark areas. Visibility is key; workwear equipped with EN 20471 certified reflective film is mandatory.

POLI-FLEX® Reflex offers two certified products, including a 3M reflective based flex.
The colored reflective range is perfect for customization with additional visibility especially on sports or kids wear as well as on satchels or bags.

POLI-FLEX®
FLAME RETARDANT

CHOOSE FIRE PROTECTION

All details are important when it comes to the health and safety of people. Make sure the flex film used for the lettering and logos on special jackets and suits are flame retardant and will not compromise all efforts put into the flame resistance of the fabrics. It may be company logos for workers on an oil platform, sponsor logos for bikers or race pilots, letterings with firefighter brigade names. Do not play with their safety: use POLI-FLEX® FLAME RETARDANT.

POLI-FLOCK TUBITHERM®

FOR THE VELVET TOUCH

POLI-FLOCK TUBITHERM® is still trendy and is often used to decorate hoodies, sweaters and jackets. The velvety look is particularly effective in combination with PU-Flex or embroidery.
It gives textiles a beautiful texture and a unique feel. POLI-FLOCK TUBITHERM® offers a dense and soft, velvety finish.
