

FS960-18M

FALL ARREST BLOCK ALUMINUM HOUSING WIRE WINCH

RECOMMENDED INDUSTRIES

FEATURES

- The fall arrest block is equipped with a winching unit that can easily be attached into place by a second person in a rescue situation after a fall or in the event of unconsciousness resulting from gases in shafts.
- The person who has suffered the accident can therefore be rescued quickly and safely.
- The interior parts are made from stainless steel and case in aluminium.
- The Tripod was especially developed for a rapid setup in conjunction with fall arrest block FS960, does not have loose parts and can be assembled and disassembled within minutes during an application.
- It's corrosion-resistant coating, high quality and reliability.
