

The SOLARIS LITE is our most compact and lightweight rechargeable LED floodlight. It can be set up and working in a few seconds making it ideal for emergency situations, offering a very high light output up to 16,000 lumens.

It can be very easily carried with the shoulder strap, making it ideal for use in remote areas. The Li-ion battery gives greater portability with a reduced weight of just 5.6kg.

Maximum height 1.3m or up to 1.7m with the additional stability tripod.
