USB FAST CHARGING BASE

Connected by standard Micro USB and with our 5V/2A-230VAC power adapter it charges the Li-Ion cell at maximum rate. With or without USB power it shows the battery status on a 5-LED light stripe at any time.

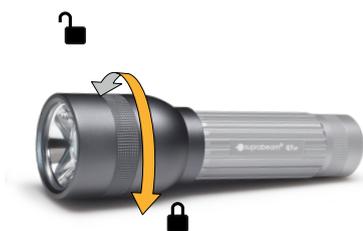

SLIDING HYPERFOCUS™

The sliding Hyperfocus™ optical system collects the LED radiance and distributes it with maximum efficiency from a perfect round floodlight beam to a highly intensive, long range spot beam. All just by one-hand sliding of the head.

DIMMING + MEMORY

The new electronic task switch combined with our new dimming control, offers simple and stepless power adjustment from 1000 down to 6 lumens. It memorizes the last used light output and with one single click it activates maximum power again.

FOCUS LOCK

When the torch is slid to Focus, simply turn the head a couple of degrees to the left to enable the lock-function. This will engage a brake-function which will prevent unwanted sliding from focus to flood beam.

2 X 5000 mAh LI-ION BATTERIES

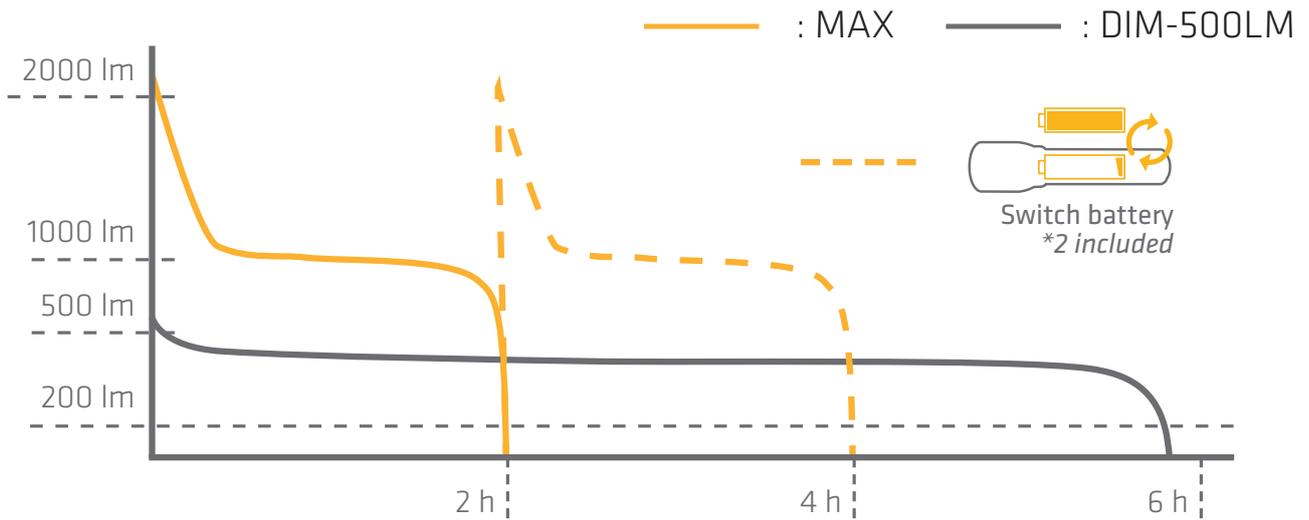

With two 5000 mAh batteries included as a standard, you can charge one battery externally while using the other in the torch. This gives you the freedom to use the torch without interruption.

DC CONVERTER TECHNOLOGY

The Q7xrs is fitted with our new and highly efficient electronic circuitry. It reduces the heat development of the Power LED and decreases the energy consumption. The advantage is 50% longer runtimes and highest constant light output.
