

#PeatFreeApril for Gardening Clubs

Using a peat-based compost contributes to climate change and habitat loss. There are many #PeatFree alternatives available, and your gardening club bulk buying by the pallet is an economical and ecological way to go #PeatFree.

[PeatFreeApril](#) is a campaign by gardeners and writers to stop the sale of peat-based compost, and we have arranged bulk-buy discounts of #PeatFree compost for your gardening club. Be sure to tell them PeatFreeApril sent you!
