

## FIRST AID KITS

### New ANSI/ISEA Z308.1-2021 First Aid Kits

In 2016 the standard was updated to this standard and has been the most comprehensive change to first aid kits in decades. The update reflects an assortment of supplies and quantities that are best suited to treat workplace injuries instead of designating kits by number of persons. New in 2021, the newest standard continues to build on maintaining and improving the Class A and Class B Standards.

### Types of Kits

**Class A:** Designed for common workplace injuries such as major and minor wounds, minor burns and eye injuries.

### Types of Containers

The kit containers are classified by portability, ability to be mounted, resistance to water, and corrosion and impact resistance.

**Type I:** Intended for use in stationary, indoor applications where kit contents have minimal potential for damage due to environmental factors and rough handling. These kits are not intended to be portable and should have a means for mounting in a fixed position. Some applications for Type I first aid kits are general indoor use, office use, or use in a manufacturing facility. First aid cabinets would generally fall into this type.

**Type II:** Intended for use in portable indoor applications where the potential damage due to environmental factors and rough handling is minimal. These kits should be equipped with a carrying handle. Some applications for Type II first aid kits are general indoor use, use in an office or manufacturing environment.

**Type III:** Intended for portable use in mobile indoor and/or outdoor settings where the potential for damage due environmental factors is not probable. Kits should have the means to be mounted and have a water resistant seal. Typical applications include general indoor use and sheltered outdoor use.

**Type IV:** Intended for portable use in mobile industries and/or outdoor applications where the potential for damage due to environmental factors and rough handling is significant. Typical applications include the transportation industry, utility industry, construction industry and the armed forces.

### Choosing a Kit

When deciding the class and type of kit that may be most appropriate, employers should consider the risks that are present and the potential severity and likelihood of an incident. Based on the number of employees, physical layout of the facility and remoteness of emergency services, employers should also consider whether multiple first aid kits are needed. These considerations also come into play when determining if a kit needs to be supplemented with additional supplies. For a variety of operations, first aid kit minimum fill requirements may not include the employer's complete need for first aid supplies. The proper selection of these items should be based on the recommendation of the person competent in first aid and who is aware of all the hazards existing in the environment and the number of employees at the worksite.

**Kits should be evaluated and inspected frequently to ensure the completeness and usability of all first aid supplies. Any supply beyond its marked expiration date should be discarded and replaced.**

### ProWorks® Class A Minimum Fill First Aid Kit

- This meets Z308.1-2021 minimum fill requirements for Class A Type I, II, III or IV
- Designed for common workplace injuries such as major and minor wounds, minor burns and eye injuries
- Color coded and unitized for ease of refills
- Made from heavy duty plastic to withstand tough work environments
- Portable or mountable
- Kit will continue to be compliant only when it is maintained with products that meet the standard

Kit Includes:		(1) Eye/Skin Wash, 1 fl oz
(16) Adhesive Bandage, 1" x 3"	(1) First Aid Guide	
(1) Adhesive Tape, .5" x 2.5 yd (total)	(10) Hand Sanitizer, 1 g	
(10) Antibiotic Application, 1 g	(2) Pair Medical Exam Gloves	
(10) Antiseptic Towlettes, 5" x 7"	(1) Roller Bandage, 2" x 6 yd	
(1) Breathing Barrier, 5.5" x 5.5"	(1) Scissors, 4"	
(1) Burn Dressing (gel soaked), 4" x 4"	(4) Sterile Pad, 3" x 3"	
(10) Burn Treatment, 1 g	(2) Trauma Pad, 5" x 9"	
(1) Cold Pack, 5" x 7"	(3) Triangular Bandage, 40" x 40" x 56"	
(8) Eye Pads w/Tape	(1) Foil Blanket, 52" x 84"
