The Glaro “Green Initiative”

Go Green! Go Glaro!

Overview

Glaro is proud to announce that we meet the most stringent parameters in our continuous effort to operate as a “Green” manufacturing corporation. Ultimately conservation is inherent in every Glaro product. Through innovative manufacturing methods and design, Glaro manufactures top quality and the most durable product lines in the industry. Because of the quality materials used, and the care given preparing our metal surfaces and applying time tested finishes, Glaro products are designed and engineered to out-perform other brands. Sustainability is enhanced by the fact that Glaro products will perform for many, many years, avoiding the need to repurchase replacement products.

Control of Glaro Raw Materials with Recycled Content

Our use of recycled materials complies with one of the most widespread environmental strategies employed by manufacturers. At Glaro we stand behind this claim. We control all of our materials since they are purchased within the USA instead from foreign counties where the content is unreliable and can be misrepresented.

Summary of Recycled Content of Raw Materials Utilized in Manufacturing Glaro Products

Raw Material	Percent of recycled raw materials	Percent that may be post consumer recycled
Aluminum sheet	10%	100%
Aluminum extrusion	50% to 100%	100%
Steel sheet	30%	100%

Raw Material Utilization

We purchase materials with recycled content, conserve their use by utilizing materials efficiently, conserving energy, recirculating water, reusing supplies during the manufacturing process. We also recycle manufacturing by-products and waste, reduce usage of items wherever possible, and evaluate our methods throughout our operation to make improvements for the future.

Glaro products are Post Consumer Recyclable

Eventually, at the end of their life, every Glaro product may be recycled, creating the "cradle to cradle" ideal of environmental conservation.

Ultimately conservation is inherent in every Glaro product. Through innovative manufacturing methods and design, Glaro manufactures top quality and most durable product lines in the industry. Because of the quality materials used, and the care given preparing our metal surfaces and applying time tested finishes, Glaro products are designed and engineered to out-perform other brands.
