## THE LEGACY OF RUBBERMAID COMMERCIAL PRODUCTS

Rubbermaid Commercial Products is an established global leader, pioneering exceptional products that outperform and outlast the competition. For over 50 years, RCP has provided solutions with industry-leading durability to meet the challenging demands of commercial facilities.

From bathmats to the first resin trash can to the first resin mop bucket, Rubbermaid Commercial Products has introduced innovative solutions to the market since 1968.

Rubbermaid Commercial Products are proudly made in the USA with manufacturing locations in Cleveland, Tennessee and Winchester, Virginia. Products are expertly crafted and tested to ensure that they meet our rigorous durability standards to deliver solutions to the market.

## MOPPING UP

## THE COMPETITION

## FOR 50 YEARS

**1974** Created the industry's first resin mop bucket.

**1976** Introduced the first looped end, tailband wet mop.

**1992** First to integrate antimicrobials directly into mop yarn for improved performance and longer life.

**#1**

### U.S. MARKET SHARE

In Traditional Floor Care including mops, brooms, and equipment<sup>1</sup>

**83%**

### BRAND AWARENESS

14% higher than nearest competitor<sup>2</sup>

### LEADING AND PREFERRED BRAND

For Traditional Floor Care in Commercial Spaces<sup>2</sup>

## BENEFITS OF MOPPING WITH RCP

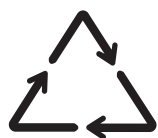

### PRODUCTIVITY

Solutions across the wet mopping portfolio make users more productive and efficient by combining multiple steps, decreasing task times, and reducing user efforts.

### HEALTH & WELLNESS

Wet mopping products deliver positive impact on the health and wellness of facilities by improving safety and reducing cross-contamination.

### SUSTAINABILITY

RCP drives a positive impact on the environment with wet mops made of recycled materials.

### IMAGE

Enhance facility image with wet mopping products crafted to improve facility environments through premium design and material choice.

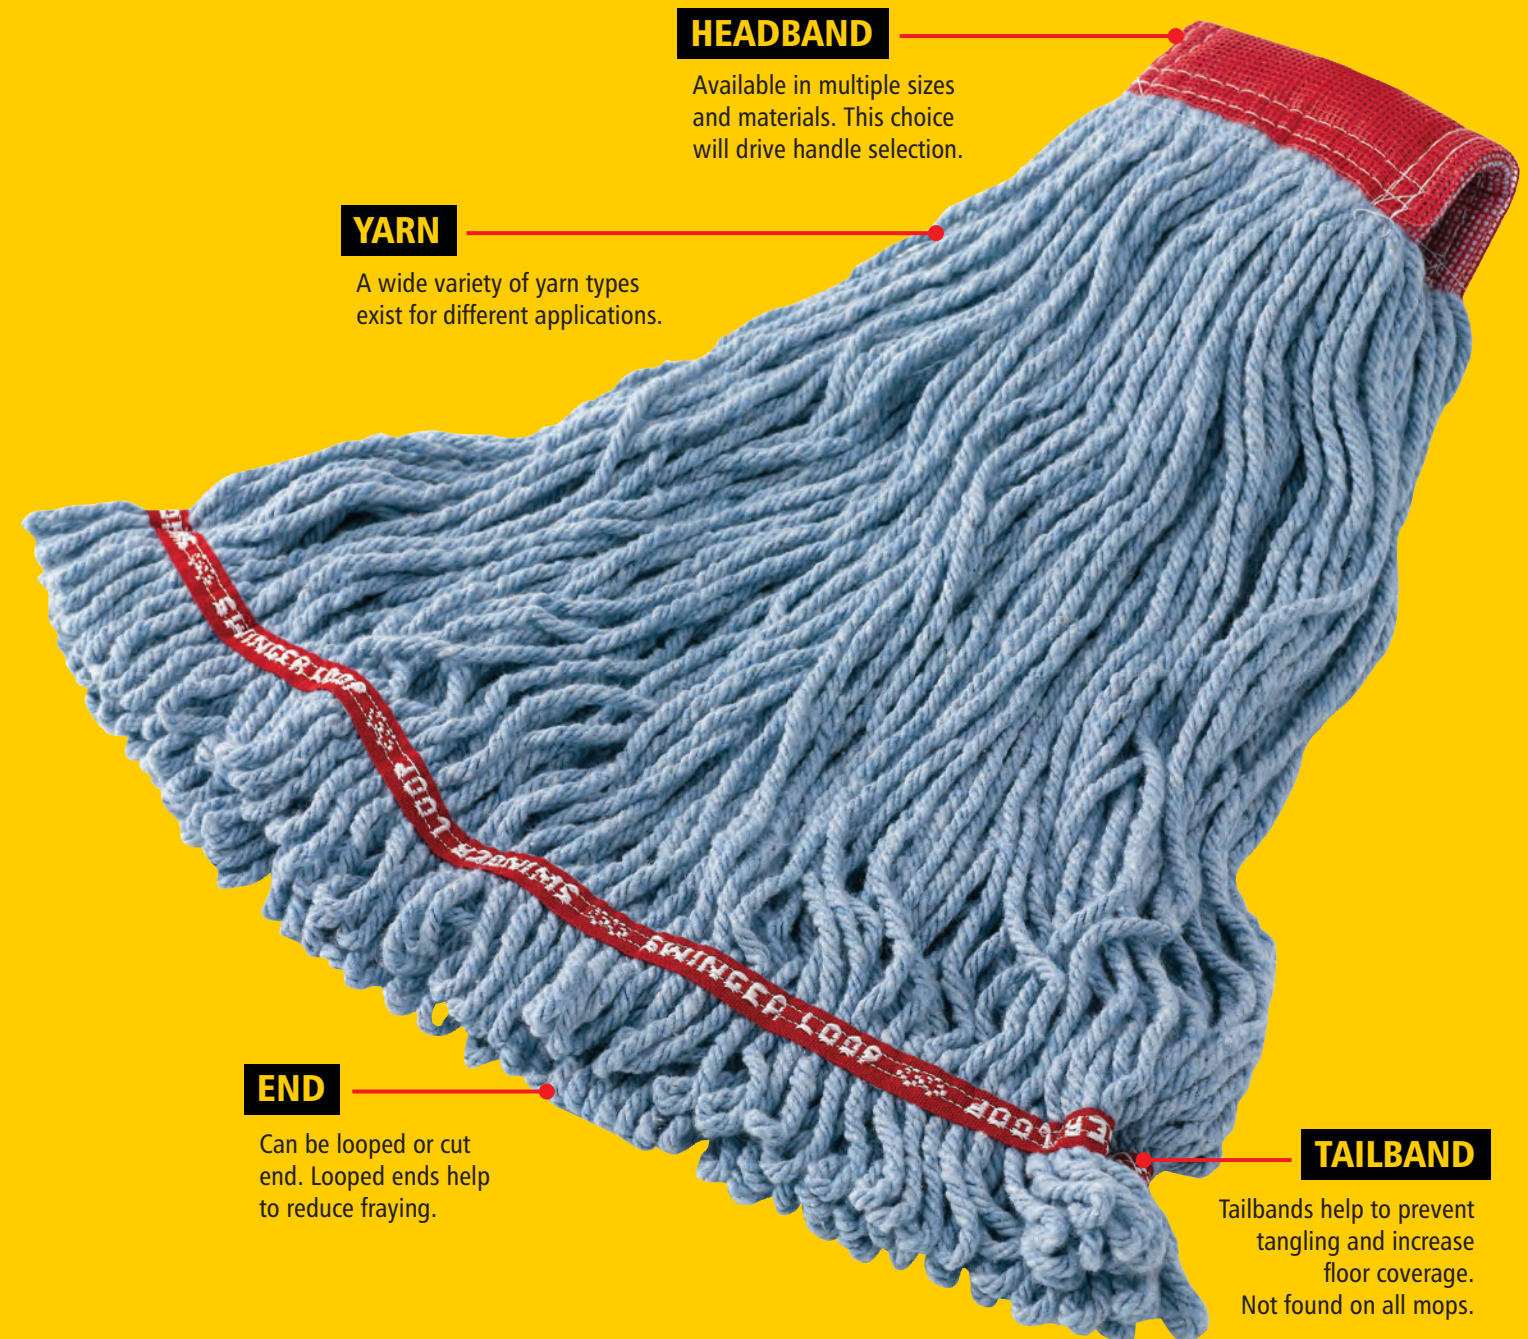

### COST IN USE

Wet mopping products save facilities money in the short- and long-term with products focused on durability, component quality, and reducing user injury.

# THE ANATOMY OF A MOP

With the variety of options available, it can be challenging to select the right mop for your needs. The details and guidelines on the following pages can help to assist in choosing the best wet mop for your floor needs.

### HEADBAND

Available in multiple sizes and materials. This choice will drive handle selection.

### YARN

A wide variety of yarn types exist for different applications.

### END

Can be looped or cut end. Looped ends help to reduce fraying.

### TAILBAND

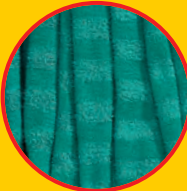

Tailbands help to prevent tangling and increase floor coverage. Not found on all mops.

# MOP CONSTRUCTION DEFINED

## YARN TYPE

Mop yarn type is the most impactful driver of mop launderability, absorbency, durability, and release. Understanding mop yarn type helps drive proper mop selection for varying applications.

### MICROFIBER TUBE

Most durable, stands up to abrasive cleaning and heavy-duty scrubbing with excellent absorbency.

### MICROFIBER

Highly durable, non-abrasive general-purpose mop.

### BLEND SHRINKLESS

General-purpose mopping. Pre-laundered for reduced shrinking. Longer-lasting and less linting compared to cotton. Highly absorbent/no break-in required.

### BLEND

General-purpose mopping. Longer-lasting and less linting compared to cotton. Highly absorbent/no break-in required.

### COTTON

General-purpose mopping. Least expensive yarn option. Reliable liquid absorption. Requires break-in, dries slowly, may lint.

### NON-WOVEN

General-purpose mopping. Least expensive wet mop option. Highly absorbent. Requires no break-in and delivers reduced linting versus cotton. Not launderable.

### FINISH

Designed to provide smooth and even release of chemical and floor finish. Less linting compared to rayon.

### RAYON

General-purpose mopping. Reliable liquid absorption. Highest quality of yarn. Resists mildew growth, extending mop life and white appearance.

### SYNTHETIC BLEND

All-synthetic mop yarns resist abrasive floor surfaces.

### CLEAN ROOM

Made of woven rayon/polyester fabric that will not fray or lint. For use in Class 10,000 and higher industrial applications.

### ROUGH-FLOOR

Knitted fleece cotton/polyester blend yarn for highly abrasive surfaces. High absorbency.

### NYLON

Non-linting, continuous filament yarn for finishing applications. High launderability.

## HEADBAND TYPE

Headbands drive mop handle selection and can be made of cloth or mesh. Mesh headbands dry faster and can sometimes be used as a scrubbing tool due to the abrasive nature of the material.

### 1" HEADBAND

Most optimal with side-gate Invader® Wet Mop Handle.

### 5" HEADBAND

Most optimal with clamp-style Gripper® Wet Mop Handle.

### UNIVERSAL HEADBAND

Compatible with Gripper® and Invader® Wet Mop Handles.

### BOLT-ON HEADBAND

Works with Bolt-on Wet Mop Handle.

## TAILBAND TYPE

Tailbands prevent tangling and improve floor coverage for more efficient mopping. Not all mops have tailbands.

### WOVEN TAILBAND

Allows for commercial laundering. Most expensive type of tailband.

### YARN TAILBAND

Requires handwashing or limited residential launderings. Economical tailband choice.

### NO TAILBAND

Requires handwashing only.

## END TYPE

Mop ends can be looped or cut, and ultimately impact mop launderability, fraying, linting, and unraveling.

### LOOPED END

Reduces fraying, linting, and unraveling. Allows for laundering, extending lifetime. Generally more expensive.

### CUT END

Economical and practical general-purpose mop. Ends may fray and unravel. Does not incorporate tailband, covering less area. Disposable or hand wash.

OTHER CONSIDERATIONS  
FOR MOP SELECTION

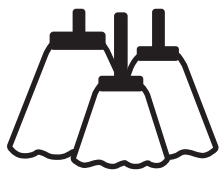

COLOR-CODED

Variety of colors available to allow users to color-code for reduced cross-contamination, improved organization/tracking, or blending into environments.

PRE-LAUNDERED

Mops can be pre-laundered to reduce linting and shrinkage during use and to speed up the break-in process.

SIZE

Select a mop size depending on the surface area that will be mopped. Sizes range from Small - X-Large, 16 oz - 32 oz, and #16 - #32.

LAUNDERABILITY

Based on the number of washing and drying cycles it can withstand before the construction of the mop is degraded or its performance declines.

ABSORBENCY

Ability to pick up and hold liquid. Higher levels allow faster floor drying times, leading to greater productivity and worker safety.

RELEASE

Ability of a mop to disperse liquid onto the floor or during wringing. Higher levels allow faster and more complete wringing, as well as more efficient application of cleaning solutions on the floor.

DURABILITY

Measure of how long it will perform before needing to be replaced.

TYPES OF MOPS

GENERAL MOPS

General mops are used for everyday mopping and cleaning of floors. Available in a variety of options to keep commercial facilities clean and safe.

SPECIALTY MOPS

Specialty mops may be used for unique floor types, specialty facilities or rooms, spill cleanup, or floor finishing.

# GENERAL MOPPING

## PRODUCT LINES

### WEB FOOT®

- Contains antimicrobial mop yarn
- Includes Microfiber Tube, Microfiber String, and Blend Mops
- Woven tailband

### UNIVERSAL HEADBAND

- No tailband
- Cotton and synthetic thread blends

### MAXIMIZER™

- Specially designed tailband delivers 30% greater spread in use
- 25% less weight
- Includes Microfiber and Blend Mops

### NON-WOVEN DISPOSABLE

- Includes tailband
- High absorbency and efficacy versus cut-end cotton mops

### SWINGER LOOP®

- Woven tailband
- Higher synthetic yarn count for increased durability

### CUT-END BLEND

- Value price point
- No tailband
- Lowest cleaning efficacy

### SUPER STITCH®

- Yarn tailband
- Cotton and synthetic thread blends

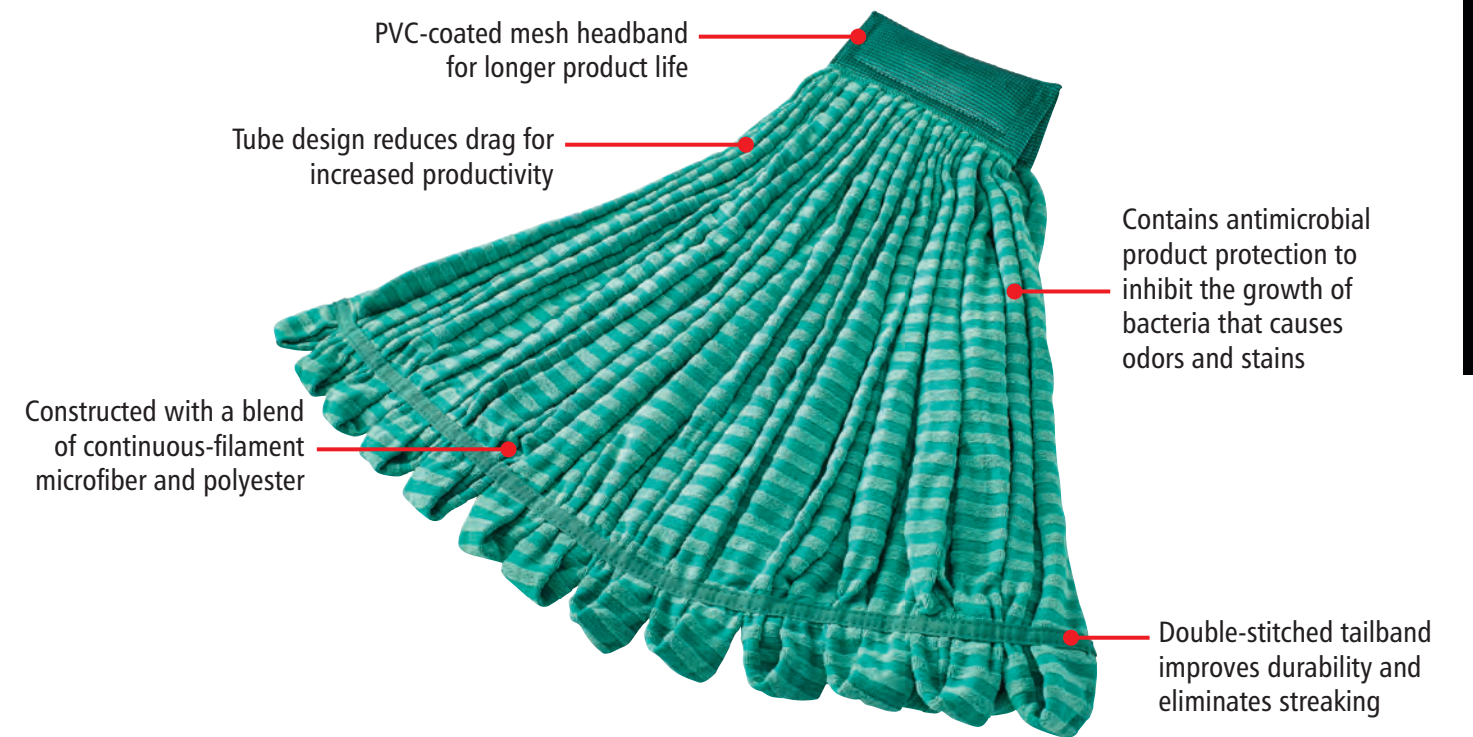

### CUT-END COTTON

- Value price point
- No tailband
- Lowest cleaning efficacy

GENERAL MOPPING

GENERAL MOPPING

WEB FOOT® BLEND SCRUBBING WET MOP

Scrub away messes that standard mops can't tackle with a mop that offers premium absorbency, durability, and launderability

WEB FOOT® BLEND WET MOP

Offers the best performance in the industry with premium absorbency, durability, and launderability

Integrated scrubbing headband easily removes stuck-on debris and allows the user to have 2 tools in 1 with the scrubber and mop

Universal headband is compatible with both Invader® and Gripper® Wet Mop Handles

Balanced blend of cotton and synthetic fibers delivers up to five times the absorbency of cotton mops

Woven tailband for improved spread and floor coverage

Contains antimicrobial product protection to inhibit the growth of bacteria that causes odors and stains

Recycled content: colors are up to 35% post-industrial cotton and 45% PET plastic; white is up to 35% post-industrial cotton

PVC-coated headband prohibits moisture retention and resists chemicals for longer product life

GENERAL MOPPING

GENERAL MOPPING

DISPOSABLE WET MOP

Achieves a better clean and reduces the spread of dirt and grime during mopping

CUT-END BLEND WET MOP

An economical solution for general-purpose floor cleaning or one-time use

Removes 3X more dirt and grease versus RCP economy cotton mops

No break-in period; immediate peak performance out of the bag to help complete jobs faster

Helps chemicals work harder; non-woven material reduces QUAT binding to enhance chemical disinfectant efficacy

Reduced shedding and linting for cleaner floors versus RCP economy cotton mops

Safe to use with standard floor stripping solutions

Tailband for improved spread and floor coverage versus RCP economy cotton mops

**DURA PRO**

1" and 5" headbands are compatible with Invader® and Gripper® Wet Mop Handles

SPECIALTY MOPPING

SPECIALTY MOPPING

SPILL MOP

Cuts the overall time required to completely remove a spill in half versus a cotton string mop, leaving a safer, drier floor

BIOHAZARD SPILL MOP

Safely and quickly remove biohazard spills, helping to prevent cross-contamination

Absorbed liquid is locked inside to prevent drips or leaks during disposal

Integrated release lever on handle helps avoid contact with soiled mop during disposal

Absorbs up to 32 oz (.94L) of water

A white, triangular mop head attached to a yellow handle. The mop head is shown with a textured surface for absorption.

SPECIALTY MOPPING

# THE ANATOMY OF A MOP HANDLE

## HEAD MATERIAL

May be plastic or steel.

## HANDLE ATTACHMENT

Where the mop attaches. Can be side-gate Invader® (left), clamp-style Gripper® (right), or Bolt-on.

## HANDLE COLORS

Variety of colors available allow users to color-code for reduced cross-contamination, improved organization/tracking, or blending into environments. Most common colors include blue, green, gray, red, and black. Color variation may be in handle or head.

## HANDLE LENGTH

Typically ranges between 54"-66" in length.

## HANDLE MATERIAL

May be wood, aluminum, fiberglass, or vinyl-covered.

# HANDLE CONSTRUCTION

## INVADER® WET MOP HANDLE

Thumbwheel clamps the mop firmly in place. Most optimal for 1" headband mops.

## GRIPPER® WET MOP HANDLE

Holds mops firmly between the jaws of the mop handle. Most optimal for 5" headband mops.

# MATERIAL TYPE

## FIBERGLASS

- Highly durable
- Available in multiple colors

## VINYL-COATED

## ALUMINUM

- Lightweight and durable
- Vinyl-coating improves durability and grip

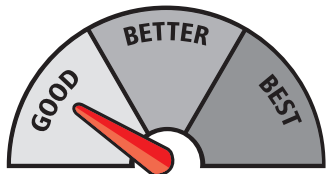

## ALUMINUM

- Lightweight and durable
- Good for general-purpose cleaning

## WOOD

- Won't rust
- Good value option

MOPPING EQUIPMENT

THE NEW  
GENERATION  
WAVEBRAKE®

PATENTED

WAVEBRAKE® BAFFLES

WaveBrake® baffles result in less splashing while mopping and maneuvering, helping to create a safer environment for patrons and staff.

REDUCES TO 80%\*  
SPLASHING

Molded-in WaveBrake baffles disrupt wave formation, reducing splashing up to 80% versus leading competitors.

\*Versus competitive U.S. 35-Qt single compartment mop bucket and wringer, not including divider bucket and accessories.

MOPPING EQUIPMENT

# THE ANATOMY OF A MOP BUCKET

## COLOR

Variety of colors available allow users to color-code for reduced cross-contamination, improved organization/tracking, or blending into environments. Colors include yellow, red, blue, green, brown, gray, and black.

## WRINGER

Wringers help remove excess water from the mop. Available in integrated wringer (left), side-press (center), or down-press (right).

## BUCKET

Available in a variety of sizes. Bucket size should be decided based on the square footage of the area that needs to be cleaned.

## DIRTY WATER BUCKET

Available as additional accessory. The WaveBrake Dirty Water Bucket nests below the wringer to keep the dirty water separate to help reduce the risk of cross-contamination.

## DRAIN

Available on 35-Qt Side-Press, standard 44-Qt WaveBrake Mop Buckets; eliminates the strain of lifting and bending when emptying mop buckets.

# MOP BUCKET CONSTRUCTION: TYPES OF WRINGERS

## INSTITUTIONAL

Available on 35-Qt WaveBrake Mop Bucket. No metal used in construction, thus ideal for correctional and health institutions where safety is a concern. No press required; use by placing mop in funnel and twisting.

## INTEGRATED

Available on RCP Tandem Bucket. Works best with smaller size mops for less frequent mopping.

## SIDE-PRESS

Available on 26-Qt, 35-Qt, 44-Qt WaveBrake Mop Buckets. Wringer designed to last 5 years or 200,000 wringing cycles.\*

## DOWN-PRESS

Available on 26-Qt, 35-Qt, 44-Qt WaveBrake Mop Buckets. Wringer designed to last 5 years or 200,000 wringing cycles.\*

\*Based on internal side-press testing.

MOPPING EQUIPMENT

WAVEBRAKE® MOP BUCKET WITH DRAIN

Molded-in WaveBrake baffles disrupt wave formation, reducing splashing up to 80% versus leading competitors\*

WAVEBRAKE® MOP BUCKET

Molded-in WaveBrake baffles disrupt wave formation, reducing splashing up to 80% versus leading competitors\*

Integrated pour spout for controlled emptying to minimize splashes and spills

Front pocket handle to lift and empty the bucket with less strain

Sink ledge allows edge of floor and utility sink edge to catch and provide balance pouring

Convenient foot-operated drain to empty the bucket without lifting

Patented WaveBrake baffles reduce splashing up to 80% versus leading competitors\*

Durable wringer is guaranteed to last 5 years or 200,000 cycles\*\*

Center pull handle for easy wringer removal and maneuverability

Integrated rear handles to help lift and empty bucket

Integrated wringer guides ensure a secure connection to mop bucket providing, stability while wringing and maneuvering to help prevent spills

Non-marking casters keep floors looking their best
