TELEVISION REMOTE CONTROL DISPOSABLE SANITARY COVERS

Remote Control Protective Cover
designed to keep your Hotel Guests
Germ Free during their travels.

POLYETHYLENE COVERS

The cover installs easily and quickly on a television remote control. The clear wrap stretches across the entire surface. The end of the bag is then folded and sealed by removing the strip and pressing against the plastic. This prevents your guest from coming into contact with the unclean keypad surface.

CLEAR WRAP

Television remote control surfaces and keypads are exceptionally difficult to clean. As multiple users are exposed to cross-contaminants materials such as sweat, blood, saliva, and various other bodily fluids. Our simple clear wrap prevents any manner of contact with these substances, thus allowing you and your family to ensure every aspect of your trip is sanitary and free of health hazards.

Order today to ensure you are providing your hotel, resort, spa, or cruise ship guests with the safeguards they deserve. Prevent and keep them safe from disease carrying microorganisms.
