

GUEST ROOM / COMMON AREA

Portable Plug-In Air Purification System

With Advanced Oxidation Cell (AOC) Technology

Continuously treat the air in any Guest Room or common area 24 hours a day, 7 days a week, to eliminate virtually any malodor including but not limited to...

- Smoke Odor (Cigarette/Marijuana)
- Must/Mildew/Pet Odor
- Food Odor
- Food Spices (Curry) Odor
- Chemical Odors (VOC's)
- General Guest Odors

...also effective on surface and air contaminants (e.g. Norovirus/Influenza)

Other Benefits Include:

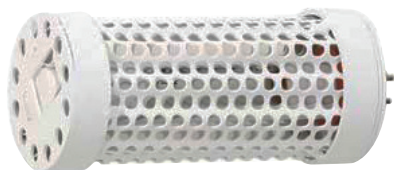

- Positive impact on Guest Satisfaction Scores related to the Guest Suite "Smelling Clean and Fresh"
- Improve overall "Indoor Air Quality" for guests and associates
- Low to no maintenance
- Safe and easy to use

Specifications:

5³/₄" W x 3³/₄" D x 11³/₄" H • Weight: 2 lbs.
Beige Polymer • 110 V • Portable
Includes: (1) 5" Standard Cell
0040328

Advanced Oxidation Cell (AOC) Ultraviolet Light + Proprietary Metal Target

Note: Standard Cells have a rated life of 25,000 hours

THE AOC TECHNOLOGY: The Guest Room / Common Area Portable Plug-In Air Purification System utilizes our exclusive Advanced Oxidation Cell (AOC) technology. The AOC Technology consists of a broad spectrum UV light surrounded by a hydrated quadmetallic coated Cell. The interaction between the two creates Advanced Oxidation Products (AOP's). The AOP's are effective in eliminating airborne and surface contaminants (e.g. viruses; fungi), and are equally effective in eradicating virtually any malodor (e.g. smoke; must). The oxidizers break down into carbon dioxide and water vapor.

Area coverage for the AOC Systems can be positively or negatively affected by the areas organic load, type of materials utilized in the room (e.g. absorptive vs. hard surfaces), treatment time, structural configuration of the area to be treated, and the capacity/specification of air conditioning units; each application will be assessed and the appropriate System will be suggested based on the assessment.
