

# CarePOD™

First Aid System

guestsupply®  
a Sysco company

**ECOLAB®**  
Everywhere It Matters.™

# CarePOD™

Great hospitality and foodservice operations are some of the busiest workplaces around. That's why strict workplace health and safety compliance requires the presence of an accessible first aid kit stocked with required supplies.

Time management and cost control are high priorities. While full-service first aid programs offer convenience, they are often inflexible and expensive. Self-service programs may offer greater control, but they are time consuming and often lead to non-compliance with safety regulations.

Putting  
**convenience,**  
**compliance,**  
and **control**  
in your hands.

**Ecolab® gives you the best of both worlds.**

Introducing CarePod™, the first aid system designed specifically for hospitality and foodservice operations. With modular options to suit every operation, CarePod puts convenience, compliance and control in your hands.

According to the ANSI/ISEA\* standard, every hospitality and foodservice operation is required to have a first aid kit easily accessible. The Ecolab®CarePod™ First Aid System helps users render first aid quickly while helping managers stay in compliance easily.

## Convenience

- First aid supplies are easily replenished by ordering online, by telephone, or through your Guest Supply representative.
- Products are delivered directly to your operation.

## Compliance

- All of the required products plus products commonly used in hospitality and foodservice operations are provided.
- Clearly marked **"ANSI/ISEA required"** bars on appropriate packages help users maintain compliance with the OSHA-enforced ANSI/ISEA standard for first aid.
- Optional Biohazard Response Cabinet provides compliance to OSHA Bloodborne Pathogens standard and Food Code requirements.

## Control

- Optional lockable storage cabinet provides secure storage of excess inventory or items not required to be openly accessible.
- You decide what you need, when you need it, giving you control of your first aid program.

## Frequently Asked Questions about First Aid Requirements

### What regulatory agencies set first aid standards?

- The Occupational Safety and Health Administration (OSHA) enforces workplace regulations based on best practice guidelines (including the ANSI/ISEA first aid standard).
- The International Safety Equipment Association (ISEA) writes the “Minimum Requirements for Workplace First Aid Kits and Supplies” standard.
- The American National Standards Institute (ANSI) oversees the development and use of standards in the U.S.

Clearly marked “ANSI/ISEA required” bars on appropriate packages help users easily identify which supplies must be stocked to maintain compliance with the OSHA-enforced ANSI/ISEA<sup>3</sup> standard for first aid in foodservice operations.

### What are the first aid requirements for restaurants?

According to OSHA regulations, every hospitality and foodservice operation is required to have a first aid kit easily accessible, and it must be stocked with specific supplies.<sup>1</sup>

### What is the ANSI/ISEA Standard?

- The ANSI/ISEA Z308.1 standard establishes minimum performance requirements for first aid kits and their supplies that are intended for use in various work environments.<sup>2</sup>
- The standard classifies first aid kits based on the assortment and quantity of first aid supplies intended to deal with most types of injuries and sudden illnesses encountered in the workplace, including major wounds, minor wounds (cuts and abrasions), minor burns, sprains and strains, and eye injuries.
