

HOW TO USE MISUSE OF PRODUCT

How to Use – The DoorPRO Doorstop is used as a temporary tool to prop open doors. Open the door all the way, placing the DoorPRO directly over the middle door hinge. Slide the DoorPRO down until it rests on the hinge-pin. Gently pull back the door until the sides of the DoorPRO rest between the hinge plates.

The DoorPRO Doorstop is designed to fit on standard and spring-loaded hinges. The DoorPRO Doorstop must only be used correctly and temporarily on the middle hinge.

Foreseeable Misuses – Do not use the DoorPRO in the door-jam wedging it between the door and its framing. The DoorPRO can be used on the upper and lower hinges which we do not recommend. Do not use a once failed doorstop as a block member to hold open the door.

Hazards - Closing or pulling on the doors with the DoorPRO in use may cause damage or injury. If a door is pulled on while the doorstop is in use, the DoorPRO will either pop off the hinge or simply fail in strength.

Safety Measures – The user should always protect the doorstop from persons that may feel that they need to close the door. Hotel Guests on check-outs may pull on door, the user is recommended to be aware of the surroundings. Watch our Instructional videos at www.doorprodoorstop.com for proper use.
