

Locker Cleaning Instructions

Locker Cleaning Instructions

Using a soft cloth or sponge, clean the interior and exterior of the locker with liquid soap, detergent, or diluted water-soluble household cleaners. Completely remove residue of any cleaning products with water and thoroughly dry with a clean soft cloth.

Important: Be certain to try, on an inconspicuous area of the locker, any solutions you plan to use as it may affect the finish of the locker. Do not use an abrasive applicator, any abrasive cleaning agent, any cleaner containing chemical detergents, or any cleaner with acid content. Doing so may result in scratching, discoloring, or even removing the finish on the locker.
