

BED MAKING WITH NO LIFTING

can help protect your
staff from injury

Hotel room cleaning is an arduous job, with intense workloads and repetitive lifting motions. Housekeepers report pain regularly and recent studies have shown that housekeepers have a significantly higher rate and level of injury as well as more lost days of work than other industries.

The Tucker® provides an easy solution for hotel staff. It is the only tool on the market that allows housekeepers to make beds without having to lift the mattress at all. The Tucker® can be used on most beds, with fitted or flat sheets & blankets as well as beds with bed skirts. The result is neatly made beds, with less back strain for your staff and reduced risk for your hotel.

ADDITIONAL BENEFITS:

- Ergonomically designed to work with either hand, for both left-handed and right-handed users.
- Thin and durable tool
- Conveniently designed handle with hole allows for simple hanging on a hook or storing on a cleaning cart
- Can be used on beds with foot boards to tuck in the bottom part of the sheet without damaging your rings or catching your fingers
- Allows for easily securing the fourth corner of fitted sheets
- Aids when tucking in flat sheets and most blankets by pushing the tool between the mattress and the box frame.

LEARNING TO USE THE TUCKER IS FAST AND SIMPLE:
