

# UNIVERSAL LUMICOVER

## NIGHTLIGHT WALLPLATE

The Universal LumiCover is a go-anywhere design that works with any décor-style (rectangular opening) receptacle or switch, including standard 120V outlets, heavy-duty 20A outlets, rocker-style switches, and GFCI outlets. It's flexible wire connection also allows use inside junction boxes where the receptacle screws are taped over, or receptacles that connect to the branch wiring via a molded connector.

AMERELLE®  
DECORATIVE HARDWARE

## FEATURES

### SAFE NIGHT LIGHT NAVIGATION

Ideal for hallways, stairways, entryways, bedrooms, basements, bathrooms, walk-in closets, and more!

### SOFT LIGHT

Projects an easy-on-the-eyes 5 lumen 3000k color temp night light that works perfectly for nighttime navigation

### EASY-WIRE INSTALLATION

Wiring is made simple and easy with the fork spade U-type wire connectors. Optionally, the wires can also be stripped and spliced into existing hard-wire connections.

### DUSK-TO-DAWN NIGHT LIGHT

Light is projected downwards and will only activate when it is dark, conserving energy.

### UNIVERSALLY COMPATIBLE

Integrates with any rocker switch and decor, GFCI, or USB outlet receptacle

### SECURE CONNECTION

The easy-to-install wires provide a more secure connection than traditional plug-in night lights.

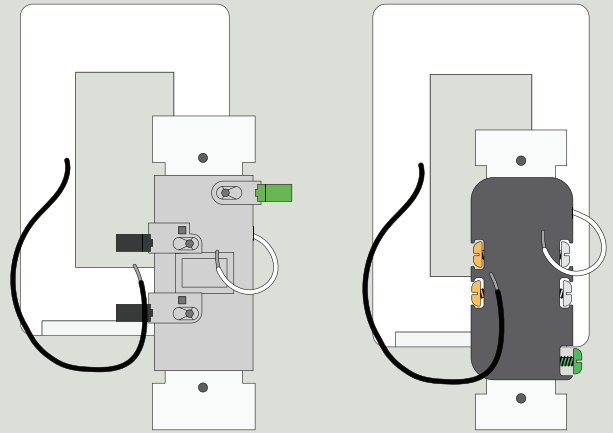

### LOW-PROFILE DESIGN

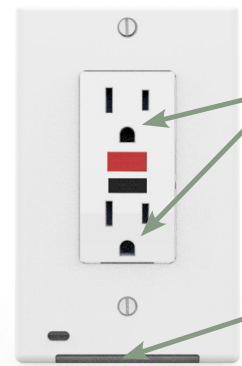

Unlike standard, plug-in nightlights, the LumiCover night light has a slim profile and leaves both outlets free for use.

## HOW IT WORKS

Our patent pending design uses two, easy-to-connect wires that can be adjusted as needed making this a versatile night light option that works with GFCI and standard outlets

The Universal Lumicover functions as a traditional night light, while conveniently keeping both outlets open and free
