Designed to support natural circadian rhythms, the **Rest-Easy Display** automatically adjusts its color throughout the day. It uses a crisp blue for daytime visibility, warm amber hues at dusk and dawn, and a calming coral red at night—a tone shown to be less disruptive to sleep and easier on the eyes after dark.

Sleep Sounds

Five curated sounds to mask noise and support restful sleep.

Sunrise Alarm

A soothing light eases guests into the day five minutes before the alarm sounds.

Nightlight

Provides a soft glow with adjustable brightness for visibility without disruption.

Rest Easy Display

Shifts display color to support circadian rhythms- easier on the eyes and backed by sleep science.
