EPA Establishment No. 105458-NY-1

The **Newaire Plugin Security Kit** is a tamper-proof system designed to minimize potential theft or damage when the Newaire Plugin is used in public areas such as hotel rooms, hallways, and restrooms.

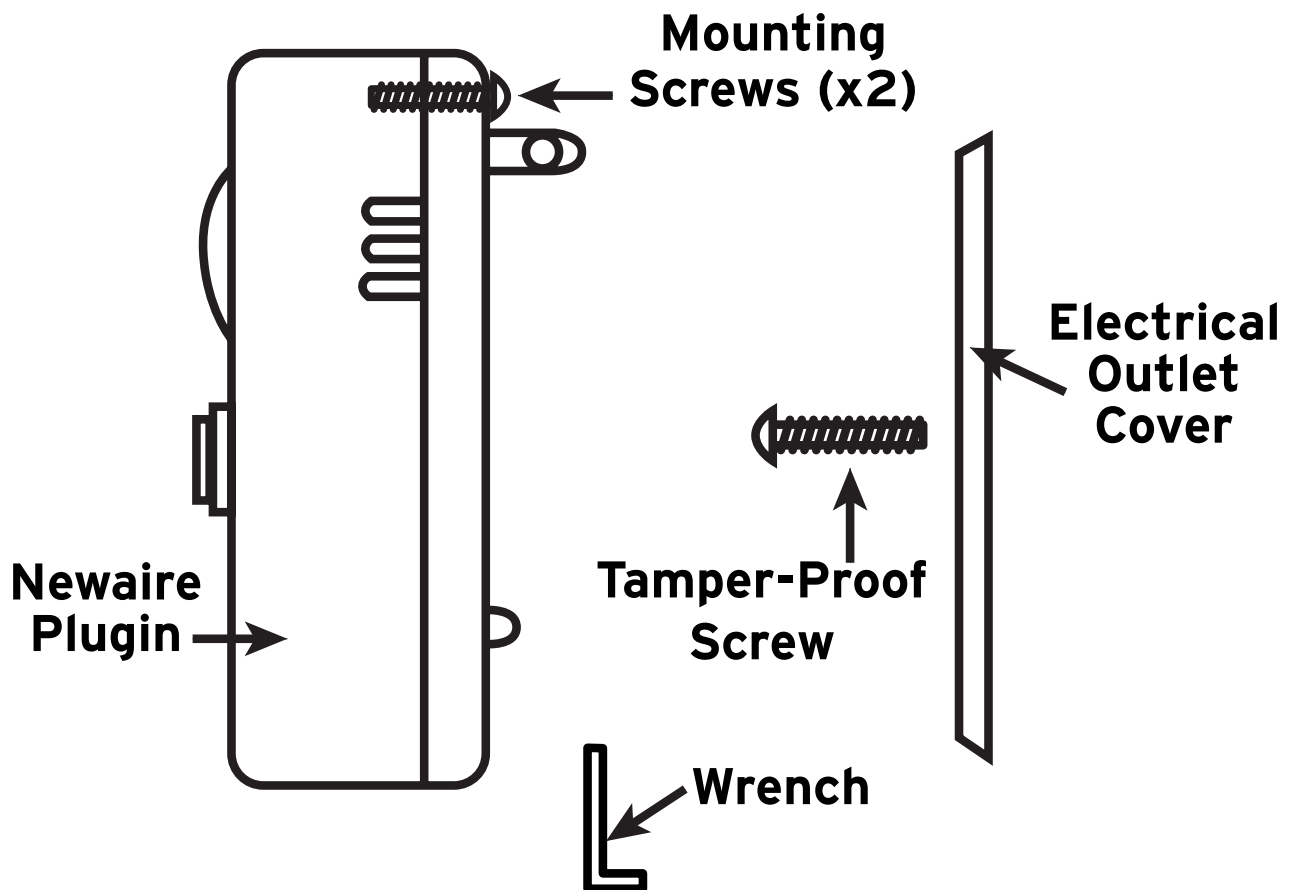

The outlet cover includes a tamper-proof screw and two mounting screws that attach the Newaire Plugin to the new cover. Once installed, it prevents the unit from being unplugged.

Although the system will help deter theft, regular inspection is recommended.

For more information, contact Customer Service at 1-877-646-9663.

ASSEMBLY PARTS

- (1) Electrical Outlet Cover
- (1) Tamper-Proof Cover Screw
- (2) Mounting Screws
- (1) Wrench

INSTALLATION INSTRUCTIONS

- 1) Remove the (2) two upper screws from the back of the Newaire Plugin.
- 2) Attach the new electrical outlet cover to the Newaire Plugin with the (2) two mounting screws included in the kit.
- 3) Remove the existing outlet cover.
- 4) Install the new outlet cover with the Newaire Plugin to the electrical wall outlet.
- 5) Fasten to the electrical wall outlet with the tamper-proof screw using the wrench included.
