

VANITY LOCKING COLLAR

OPERATION INSTRUCTIONS

Securing to Surface Using 3M Adhesive Tape:

BEFORE YOU BEGIN

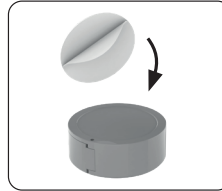

Choose a flat mounting location away from any obstructions that may prevent proper function of the key, locking arm, or bottle.

PREPARE THE SURFACE

Clean the mounting surface to remove any dirt, oils, or soap residue.

Then, using a fresh clean cloth, wipe the surface with isopropyl alcohol. Allow to dry.

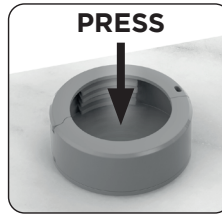

ATTACH THE BRACKET

Remove the protective film from one side of the 3M adhesive tape. Attach the tape to the bottom of the bracket. Be sure not to touch the adhesive surface.

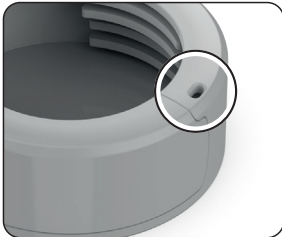

Remove the remaining protective film from the tape and place the bracket in position.

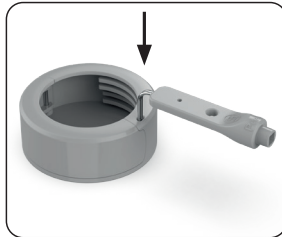

Be sure to position the bracket correctly so the locking arm opens to the front (key hole should be on the right side).

Firmly press the bracket against the surface for **30 SECONDS** for the adhesive to properly cure.

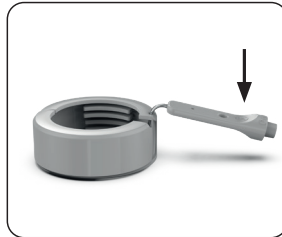

Operating the Bracket:

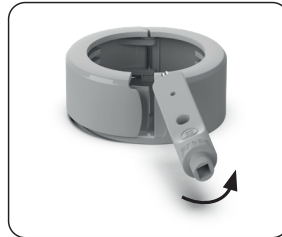

1. Locate the small slot on the shoulder of the bracket.

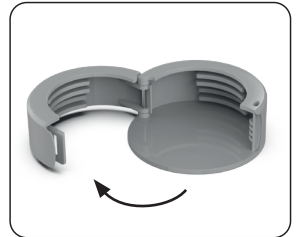

2. Insert the key straight down into the slot.

3. Once fully inserted, press downward on the key handle to release the lock.

Tip: Rotating the key counter-clockwise while pressing downward may help the lock pop open.

4. Remove the key and open the locking arm.

5. Slide the bottle straight back into the bracket.

6. Close the locking arm. The mechanism will lock automatically and you should hear a "snap."

VANITY LOCKING COLLAR CARE INSTRUCTIONS

These guest room accessories are handcrafted and require special care for long term enjoyment.

CAUTION: DO NOT USE

Abrasive cleaning chemicals

Acidic cleaning chemicals

Abrasive cleaning sponge / cloth

RECOMMENDED CLEANING INSTRUCTIONS

Use clean damp cloth with mild soap to gently wipe down the bracket, bottles & pump spouts.

Wipe with clean damp cloth to remove soap.

With a dry clean cloth, wipe off all cleaned areas to remove water spots.

Warranty available upon request.
