

GWL Voices Statement on Gaza

As members of **GWL Voices**, we are *deeply alarmed* by the ongoing humanitarian catastrophe in **Gaza**, where civilians—especially women, girls, and children—bear the brunt of the conflict.

Across the region, families are enduring displacement, acute shortages of food, water, and medical services, and the loss of homes and communities. In many areas, the population is now confronting famine-level conditions.

We urgently call on Israel and all relevant parties to:

1. **Guarantee safe and unimpeded humanitarian access** to every person in need.
2. **Immediately implement a ceasefire** to prevent further civilian casualties and alleviate suffering.
3. **Release all remaining hostages and undertake prisoner exchange.**
4. **Return to good-faith negotiations**, in line with UN resolutions, to pursue a fair and enduring twostate solution.

We affirm that there is **no military solution** to this conflict. Only through respectful dialogue, full respect for international law, and earnest dedication to peace can this cycle of violence be broken.

As women leaders, we urge a response that **prioritizes civilian protection**, honors human dignity, and sets the foundation for sustainable peace.
