Breco, LLC warrants to the original purchaser that the Y Series Transit Case is free from workmanship and material defects for a period of one (1) year from invoice/receipt date. This product is covered by this limited warranty.

**Y SERIES™
TRANSIT CASE**

HOW TO USE

STEP 1

Set the case on a flat surface with the lid facing up. Fully unzip lid of case and open.

STEP 2

Make sure the Y Series Fire Pit is completely cooled down. Adjust legs of the fire pit to STOW setting. Fold handle on the fire pit all the way down.

STEP 3

Align handle on fire pit with handle opening on case. Place the fire pit right side up into the case. Make sure the handle of the fire pit can be folded out of the opening in the side of the case.

STEP 4

Insert any items such as gloves, wood pellets, fire starters, tinder, etc. you want to store inside the fire pit (we suggest avoiding heavy, clunky items that may shift and rattle during transport).

STEP 5

Close the lid and fully zipper shut. Use the exposed handle of the fire pit or the two handles on the case for transport. Use attached D rings to strap down/secure if needed. Make sure the handle on the Y Series Fire Pit is folded down and out of the way when packing.

CARE

Dump out any ash or debris that may have gathered inside the case. Use a damp cloth to wipe out any residual ash or debris left behind. You can also use a damp cloth to clean the outer surface of the case.

WARNING

For use with Breeo Y Series Smokeless Fire Pit only. Always make sure the fire pit is cool to the touch before placing it in the case. Do not place the fire pit into case while it has hot coals inside or if still hot. Fabric of the case is not flame or heat proof.

Make sure the lid of the case is completely closed before transport.
