

For Spray Application of Floor Chemicals

The HAWK Osprey Pro 2G Backpack Sprayer allows a user to apply cleaning products, surface protectants, dyes and densifying agents with speed and accuracy. The commercial-duty, “no-leak” design stems from tight specifications, corrosion resistant materials and Viton® seals. Padded straps are adjustable for comfortable use by personnel of all sizes. A top mounted carrying handle and wide base assists in transport and mounting on the operator’s shoulders.

Engineered Design

- Internal “No Leak” piston pump design is safer to use - chemicals will not drip down your back
- Durable, 21 inch poly-lined stainless steel wand with the highest quality Viton® seals is chemical resistant
- A continuous spray switch can lock the nozzle to the “on” position. Convenient for larger jobs
- Premium, lockable shut-off valve with brass components and in-line filter
- The pump is easy to access. Change seals in just minutes without tools.
- Includes 3 nozzles to select spray pattern; brass adjustable flat fans, and foaming nozzle.
- Padded backpack style straps allow the operator to comfortably carry the sprayer
- Sturdy carrying handle and wide stable base.
