

GET THE RIGHT HARDWARE FOR YOUR LOCATION

Let the experts in Visual Communications design the technical backbone of your solution.

Don't roll the dice on your hardware investment. Our Design Engineering team considers your unique environmental factors before mapping out your ideal hardware solution. In addition to expert hardware recommendations, you'll receive detailed drawings that help you avoid potential implementation pitfalls and get the right combination of hardware for your Visual Communications solution.

AV DESIGN OFFERINGS:

AV Base – You'll get:

- Remote hardware consultative design services
- Detailed hardware specification sheets for all hardware quoted
- An AV Design specification sheet that includes hardware recommendations
- Advanced notice of potential environmental concerns involving space
- Identification of general concerns, guidelines and recommendations regarding the repurposing of existing customer owned hardware
- A basic, flowchart style installation diagram with all hardware and peripherals quoted by FWI

AV Comprehensive – You'll get:

- All elements of Base service
- An initial onsite consultation*
- All data collected from onsite visit including but not limited to pictures, detailed measurements of space, ambient lighting readings, internet speeds (WIFI and/or hard line speeds)
- CAD installation packets providing robust engineering drawings with all quoted hardware and peripherals provided by FWI
- Architectural support drawing files

*A single onsite visit is included with the AV Design Comprehensive service but does not include travel expenses. The expenses associated with travel will be added to the Professional Services quote or as an onsite line item.

TRUST THE EXPERTS IN VISUAL COMMUNICATIONS
