KNAPE & VOGT®

KV Drawer Slides. Single Source. All Solutions.

Knap & Vogt is your single source for one of the most comprehensive selections of drawer slides on the market today. Our product line covers the entire spectrum of performance and value, supported by a full range of design, manufacturing and service support. The result is a selection of brands with a depth and breadth that is unparalleled in the industry, including:

Designed and built to exacting specifications, and marketed from our base in Grand Rapids, Michigan, USA, KV is the premium slide of choice among architects, designers and builders of high-end cabinetry, furniture and equipment.

Engineering and manufacturing know-how are built into KV GSlide, our best-in-class ball-bearing and undermount import slide. KV GSlide offers four ball bearing models including soft-close and push-to-open technologies. The KV GSlide undermount features soft-close technology along with multiple drawer alignment features.

Designed to meet the needs of today's value-conscious professional, the KV Tru-Trac Slide offers performance and economy backed by proven Knap & Vogt quality, reliability and service.

An economy grade slide engineered to compete with today's value-priced slides, KV DuriSlide is the right choice in a medium-duty slide for the professional on a budget.

First Name in Drawer Slides

Knape & Vogt brings together high-quality materials and advanced manufacturing processes to design and manufacture KV Drawer Slides, an extensive collection of durable, long lasting slides that consistently exceed standards for quality, value, and service. Whether your application calls for ball-bearing, undermount, specialty or roller slides, the KV brand offers a full range of styles, weight capacities, lengths and finishes to meet almost any need.

Precision Ball-Bearing Slides

At the center of our product line are ball-bearing slides, especially those in the medium-duty, 75 lb. to 100 lb. class. With a precision ball race forged from high-strength steel and more ball-bearings per inch than most competitors, our ball-bearing slides are among the quietest and smoothest-gliding in the industry. Finely tuned designs provide a host of in-demand features including soft-close, self-close and push-to-open. Which means you'll find KV slides in a wide range of drawer applications from the lightest duty keyboard tray to custom cabinetry and woodwork installations to heavy-duty vehicular, tool storage and electronic equipment uses.

Medium-Duty

8400 Series

The heart of the market, KV produces top-of-the line medium-duty ball-bearing slides. Our premier 8400 Series features 100 lb. class full extension and 90 lb. class over travel slides ideal for box or file drawer applications. The series features a 32mm hole pattern with direct access mounting, a push-in lever disconnect for easy drawer removal and a non-handed design with a variety of options available in several models.

Models

8400: Full extension
8405: 1" Over travel
8407: Full extension, integrated shelf tabs
8414: Full extension, hold-out

8450FM Series Soft-Close

The breakthrough 8450FM Soft-Close Slide with patented Force Management™ technology features 100 lb. class full extension and 90 lb. class over travel best-in-class slides, delivering smooth, quiet operation and secure close without slamming. It is ideal for desk and credenza box drawers, cabinetry and millwork.

Models

8450FM: Full extension
8455FM: 1" Over travel

8417, 8419, 8400RV Self-Close

The 100 lb. class full extension and 90 lb. class over travel slides are designed for kitchen and residential cabinetry, wood pedestals, casework and institutional furniture. Its fully integrated self-close module allows for a slide-assisted close and helps hold the drawer in the closed position.

Models

8417: Full extension
8419: 1" Over travel
8400RV: Full extension, heavy-duty

8420, 8425 Series Metal Cabinet and Drawer Slide

The 100 lb. class full extension and 90 lb. class over travel metal application slide feature tool-less installation, lever disconnect and hold-in detent. This slide is ideal for metal desks, cabinets, tool storage carts or medical equipment carts.

Models

8420: Full Extension
8425: 1" Over travel

Heavy-Duty

6500 Series Heavy-Duty

The 6500 Series 125 lb. class slides support box or file drawer applications with wider drawers and heavier weight capacity. Two models feature closed position hold-in detent to prevent bounce back.

Models

6500: Full extension, lever disconnect
6505: 1" Over travel, quick disconnect rail

8500 Series Lateral File Drawer

The heavy-duty 8500 Series slides are 150 lb. to 175 lb. class slides designed for desk drawers, credenzas, pedestals, wide kitchen drawers and lateral file cabinets. Each features a quick disconnect rail, 32mm and traditional mounting holes and hold-in detent to prevent bounce-back.

Models

8500: Full extension, for max. 36" drawers
8505: 1-1/4" Over travel, for max. 30" drawers
8520: Full extension, for max. 42" drawers
8525: 1-1/4" Over travel, for max. 36" drawers

8600 Series Heavy-Duty

The heavy-duty 8600 series are designed to accommodate wider and heavier drawers for today's challenging applications in the commercial, residential and education markets. This slide has a shorter profile vs. traditional lateral file slides and features a lever disconnect.

Models

8600: Full extension, butterfly disconnect
8605: 1" Over travel, butterfly disconnect

8620 Series

The 150 lb. class full extension and 140 lb. class over travel metal application slide feature tool-less installation, lever disconnect and hold-in detent. This slide is ideal for metal desks, cabinets, tool storage carts or medical equipment carts.

Models

8620: Full extension
8625: Over travel

8650FM Series Heavy-Duty Soft-Close

The 8650FM Soft-Close Full Extension Drawer Slide is designed to accommodate wider and heavier drawers for today's challenging applications in the commercial, residential and education markets. This slide has a shorter profile vs. traditional lateral file slides and features a lever disconnect.

Models

8650FM: Full extension, butterfly disconnect
8655FM: Over travel, butterfly disconnect

8810 Series Heavy-Duty

The heavy-duty 8810 Series are 200 lb. class slides designed for use wherever strength and durability are required, including tool storage, truck bodies, lateral files and other commercial or industrial applications. Two models feature closed position hold-in detent to prevent bounce back and a non-handed design.

Models

8810: Full extension, lever disconnect
8815: 1" Over travel, quick disconnect rail

8820 Series Heavy-Duty

The 200 lb. class full extension and 190 lb. class over travel metal application slide feature tool-less installation, lever disconnect and hold-in detent. This slide is ideal for metal desks, cabinets, tool storage carts or medical equipment carts.

Models

8820: Full extension, butterfly disconnect
8825: 1" Over travel, butterfly disconnect

8900 Series Extra Heavy-Duty

The extra heavy-duty 8900 Series are 500 lb. class full extension slides designed for use wherever extra strength and durability are required, including residential, commercial and office furniture, school and institutional casework, heavy-duty tool storage and a range of specialty commercial, industrial and vehicular applications. All are non-disconnecting and feature a non-handed design.

Models

8900: Full extension
8908: Full extension, lock-in/lock-out
8909: Full extension, lock-out
8910: Full extension, lock-in

Light-Duty

8300 3/4 Extension

The 8300 Series is a 75 lb. class, 3/4 extension slide family perfect for light-duty desk, credenza and pedestal box drawers, cabinetry and millwork. Four models feature a 32mm hole pattern.

Models

- 8300: Quick disconnect rail, handed
- 8350: Lever disconnect, non-handed
- 8355: Lever disconnect, hold-out, non-handed
- 8357: Lever disconnect, hold-out, integrated shelf tabs, non-handed

4400 Series Low Profile

The 4400 is a 65 lb. class, full extension slide designed for box drawers, pedestal file drawers or other applications where a low-profile is preferred. Features a push-in lever disconnect for easy drawer removal, hold-in detent to prevent bounce back and optional front and rear brackets.

Models

- 4400: Full extension

4430 Push-to-Open

The 4430 is a 65 lb. class low profile push-to-open full extension drawer slide that is ideal for applications where knobs, levers and handles are not desired and where positive hold-in is required. Features a lever release for easy drawer removal.

Models

- 4430: Push-to-open

4450 Soft-Close

The 4450 is a 65 lb. class full extension drawer slide with soft-close that is designed to accommodate lighter and shallower low height drawers for home and commercial applications where a low profile slide is desired. It features a lever disconnect for easy drawer removal and a soft-close module that delivers a smooth open and quiet, secure close without slamming.

Models

- 4450: Soft-close

Undermount Drawer Slides

The premier choice of cabinet makers, MuV+ Undermount slides raise the bar for undermount function. The patented MuV+ and MuV+HD soft-close module provides a quieter-than-ever soft-close and smooth operation that is unmatched in the industry. MuV+ slides also are flexible, with height, side-to-side and inset adjustment features preferred by cabinet makers everywhere. KV Undermount slides are designed for medium- to heavy-duty applications that require concealed hardware, including cabinets in the kitchen and bath, custom cabinetry in home or office and more.

MuV+

MuV+ Medium-Duty

This medium-duty 75 lb. class full extension undermount drawer slide is designed to highlight quality craftsmanship by concealing slide hardware in applications such as wood office furniture, kitchen cabinetry and drawers in other home environments. MuV+ accommodates drawer material thicknesses ranging from 1/2" to 5/8", while MuV+34 is recommended for drawer material from 5/8" to 3/4" thick. For use with drawers up to 32" wide depending on drawer height.

Models

MuV+: Full extension

MuV+34: Full extension

MuV+ / MuV+34

MuV+HD Heavy-Duty

This heavy-duty 120 lb. class full extension undermount drawer slide is designed to highlight quality craftsmanship by concealing slide hardware in deep drawers with heavy loads found in kitchen islands and other deep and wide drawer applications. It is available in two models: MuV+HD accommodates drawer material thicknesses ranging from 1/2" to 5/8" and MuV+34HD is recommended for use with drawer material ranging from 5/8" to 3/4" thick. Both are for use with drawers up to 30" deep and 42" wide.
