Empty Canister Returns

We will pay freight to return all large returnable cylinders per our Empty Canister Return Policy. Please read prior to returning canisters in order to meet minimums for return and proper packaging requirements. All Empty Canister Returns must have properly completed Empty Canister Return paper work prior to sending back empties. For more information, please contact customer service at service@choicebrands.com

Instructions for Disposable Canisters

Once the canister is totally empty and the hose removed, open canister valve completely and allow all vapors to escape. Leave the canister valve open and allow canister to sit overnight. Punch out the pressure relief disc on top of the canister with a brass punch and hammer. A brass punch must be used to avoid any sparking. Canister is now ready to be placed in a landfill or recycled as scrap steel. Be sure to consult Federal, State and local authorities for approved disposal procedures in your area.

DO NOT PUNCTURE, except as stated in paragraph above. **DO NOT** incinerate containers. Give empty canisters to a disposal or recycling service equipped to handle pressurized containers. Consult Federal, State and local authorities for approved disposal procedures in your area.

Standard and Made to Order (MTO) Product Availability
