T34IUCLB030018 4 x 8 3/4" Uniboard Classic Black 631 2S PBC @ 890/m

## **LUMBER SPECIALS**

**5/4 # 1 com Cherry**  
(HL1800541T)

**5/4 Basswood**  
(HL140180161T)

**6/4 Red Oak**  
(LURO06FB600111)

## **MORE THAN WOOD**

## Marquetry goes 3D in Scott Grove's breakthrough patriotic creation

CANANDAIGUA, N.Y -- Master veneer artist Scott Grove has taken his latest marquetry project to a new dimension by applying 3D graphic techniques to make a marquetry image seemingly come out of the wood. Grove, a multiple winner of the prestigious Veneer Tech Challenge Award, achieved his special effect by combining 32 hand-cut, custom-dyed veneer pieces with chroma color separation in a classic process, creating a completely new method of marquetry. When the work is seen through a pair of red and blue 3D glasses, Uncle Sam's finger jumps off the surface and points directly at the viewer. Many of the visual elements are made from fine, thin strips of red, blue and green-toned veneer, with a number of them overlapping the central form. One of the technical challenges was to pick the right progression of dyed veneers, and sequencing them was quite challenging; the layup took more than 50 hours of magnified detailed work.
