Our intent is to illustrate the best identified matching references at time of publication. Roseburg recommends contacting various component manufacturers for current availability and minimums. Roseburg recommends comparing actual samples of TL, HPL, RTR and edge banding. For additional and updated information, please see: www.Roseburg.com. ■ = Dillard, OR and Missoula, MT. ● = Simsboro, LA. ◆ = Available in Cambium texture.

From the forest to the finished product, great design considers sustainability. Roseburg owns and sustainably manages over 630,000 acres of timberland, 173,000 acres of which are FSC® certified. During manufacturing, we process and recycle 1.5 million tons of reclaimed wood waste annually, converting it into panels that sequester carbon. Duramine can be purchased with FSC Mix Credit Certification.

The mark of responsible forestry

## Roseburg Duramine® Thermally Fused Laminate Panel

### Roseburg Duramine® BEST SELLERS

Roseburg's Best Sellers Collection contains a broad selection of designs that are proven relevant to today's design applications. Whether it's a classic that's always in demand, or a newer design that's strongly trending, each Best Seller design fills a specific need. We offer only the designs we believe people are most likely to appreciate - from classic solids like black, gray, and white; to trending woodgrains like mahogany and walnut. Our collection is comprehensive enough to offer something for virtually every application, but streamlined enough that we can routinely manufacture it and keep it generally in stock at a Roseburg dealer.

Roseburg Duramine® Thermally Fused Laminate (TFL) panels consist of melamine resin saturated decorative papers, thermally fused under heat and pressure to a substrate of Roseburg UltraBlend particleboard, or medium density fiberboard (MDF). The TFL process permanently bonds

the paper and the board therefore, there is no glue line to delaminate.

### RELEVANCE COLLECTION

The designs in this collection work together, are relevant to today's trends, and have broad appeal. Complex grays and neutrals combine warm and cool colors to net a cohesive balance and increase usability.

### CAMBIUM TEXTURE

Texture is the final frontier in TFL panels, and the Duramine Relevance Collection and Linea designs have entered it boldly with the striking new Cambium texture.

Like the Relevance Collection and Linea designs, Cambium has universal appeal. Linear structures have caught the eye of designers and consumers across the globe. In North America, these clean textural lines are popping up everywhere in commercial and residential design.

Cambium is a fresh new take on TFL texture, adding realism to the touch and eye-catching lightplay to your projects and designs.

### ENHANCED SERVICE PROGRAM (ESP)-

ESP is a high priority, specialized program developed for Roseburg's customers to provide the right Duramine Thermally Fused Laminate panel, when you need it and where you want it. ESP is a size, core and design specific program that includes three levels of service. The program offers accelerated service from the mill on our most popular panels. For more information about how this extraordinary service program can help your business, contact your local Duramine distributor or Roseburg sales representative.

### Roseburg SkyBlend® Particleboard

All Duramine panels are available on Roseburg SkyBlend® core, a ULEF particleboard.

Certain minimums and lead-times may apply.
