Where Inspiration and Design Meet Supply

The Paxton Advantage

Decorative Surfaces Are Used Everywhere!

Today, residential and commercial interior designers have available to them a broader range than ever before of decorative surfaces and use them to create innovative, emotive and functional interiors. Decorative surfaces are used on virtually every type of exposed surface be it kitchen, bath and storage cabinets, office or residential furniture, and increasingly on feature walls, all of which combine to create the desired living or work environment. Our surfaces are available in natural wood, reclaimed wood, and composite or synthetic. Synthetics may be deeply embossed to provide textures that mimic Mother Nature or satiny smooth or high gloss to reflect light and enhance color.

Our Decorative Surfaces address a broad range of criteria important to designers and end-users: design, color, surface texture, quality, functionality, and durability. Material cost and life cycle costs are also a factor in determining which material is best suited for an application. A final and very important consideration is the very reliable suppliers standing behind our products ensuring the timely supply of top quality and consistent materials.

We invite you to review our Decorative Surfaces Collection and encourage you to meet with our very knowledgeable staff to discuss all supply options.

NEW - Dragon Ply UV Panels Now Feature Antimicrobial UV Finish

Dragon Ply UV prefinished panels now feature Antimicrobial protection in addition to its many other value-added attributes that make it the best in the industry.

SUPERIOR surface quality. 100% of Dragon Ply SMART production utilizes a multi-step calibration lamination. These extra steps ensure the smoothest, most uniform surface quality available in veneer core plywood.

MATERIALS are the first step in ensuring consistent top quality plywood. Face veneers are individually inspected by our Quality Control staff providing consistencies in performance and the highest aesthetic value available from the grade.

ANTIMICROBIAL UV technology uses a nano silver ion antibacterial agent to provide users with additional peace of mind. This laboratory tested UV options kills 99.9% of bacteria. All Dragon Ply SMART panels made with this nano technology are edge printed with SMART for easy product identification.

RELIABLE performance in every panel. Quality Control staff rigorously inspects products from around the globe to ensuring Dragon Ply SMART delivers the most reliable performance EVERY TIME it is used.

THICKNESS tolerance. Dragon Ply SMART thickness tolerance is +/- 0.3mm. This is two times more stringent than ANSI/HPVA standards, resulting in more accurate layouts, production, and installation performance.

DRAGON PLY®
