A SOUND DECISION

SOLID CORE

DOORS

We are on a mission to put solid core doors in every home. Made of solid material all the way through, they feel more substantial and block sound more effectively. For minimal cost, solid core doors create a dramatic improvement in overall quality.

- ▶ Solid core doors are **SOUND REDUCING** they block sound more efficiently than hollow doors.
- ▶ Solid core doors are simply built better with a strength you can **FEEL** the moment you open the door.
- ▶ Solid core doors are **DURABLE**, able to withstand the dents and dings of normal wear.

It's time for a better door experience.

Make solid core doors the **STANDARD.**

Interior Doors

AT A GLANCE

Our dedication to superior craftsmanship allows us to deliver unsurpassed quality and value in interior doors. We offer a comprehensive selection of door styles—all crafted with exacting attention to detail.

*Thinner outer style will not affect functionality.

**Not for use with double doors.

Note: 48", 60" and 72" bifolds are achieved by doubled 24", 30" and 36" bifolds.

Molded Panel Doors Notes: Please note that some sizes are only available as a result of being trimmed from a larger facing. The trimming process may result in a stile width that is too narrow to accommodate a standard bore. To machine a standard bore with a 2-3/8" backset on the lock hole and a 2-1/8" diameter bore, the outer stile measurements must be no less than 3-7/16" wide. Many facings have a lockrail that will accommodate a standard bore even when the stile width is too narrow. Please refer to Masonite Molded Door Facing Dimensional Specifications to verify the outer stile measurements or contact your Masonite Interior Door servicing plant. Textured refers to embossed wood-grain. Pre-finished white is available as textured only. Not all molded panel designs and sizes are available in all regions as stock products. Please check for special order availability.
