Enigma

WF456

Texture: Boreal

Filigree like feathers! This walnut was sanded in a diagonal direction, transparent oil with a touch of pigment emphasizes the signs of the processing.

Playing with trends of butcher block and herring bone walnut lumber was sanded diagonally across the grain to create a balanced "mixed width" layout, alternating the diagonals to create a chevon effect. The result is a textural and unique interpretation of a walnut décor, abstract but at the same time easily recognizable as a woodgrain.

Fresh, usable and innovative... this décor is at home in a wide variety of applications from residential to commercial.
