Count on Rugby to deliver precisely engineered cabinets with your choice of traditional or contemporary door styles along with an extensive assortment of Rev-A-Shelf accessories. All our products are engineered from high quality materials and backed by comprehensive product warranties.

- Over 1000 different cabinet accessory options
- Both contemporary and traditional door styles
- Comprehensive Rev-A-Shelf hardware program

SAMPLE SPECIES

Founded in 1957, Columbia Forest Products is North America's largest manufacturer of hardwood plywood and hardwood veneer products. Columbia's decorative interior veneers and panels are used in high-end cabinetry, fine furniture, architectural millwork and commercial fixtures.

- Species: Various
- Face grades: A,B,C,D,E
- Back grades: 1,2,3,4
- Sizes: 4x6, 4x7, 4x8, 4x10, 5x8, 8x4
- Thickness: 1/8" to 1-1/4"
- Core types: JayCore®, KayCore®, veneer core, particleboard core (PBC), medium density fibercore (MDF), combination core, Classic Core®, lumber core
- UV Capabilities
- FSC® certified available on request

PBC, MDF, and a VC made from finest Aspen Core Oversized available 5' x 8', 4' x 10', and 5' x 10' UV capabilities.

EDGEBANDING

Contemporary Softwood Panels

For the 'Nørdus' collection, only the best softwood and birchwood is collected and carefully processed into finely cut veneer. This way, the raw materials are optimized advanced surface treatments reinforce the unique beauty of wood and highlight its 3D aspect.

A Nørdus panel is composed of a top layer of real wood veneer, a core of 18 mm MDF and a backing of real wood veneer for stability reasons. The top layer is always a jointed veneer sheet in accordance with the chosen design, composed using our mix match technique.

- Unfinished panels are easily customized to cover broad color palette range
- Scandinavian influence integrated into modern design
- Mixmatch technique to give natural appearance of solid wood
- 19mm x 4' x 9' G2S Panels
- Matching .6mm thick edgework
- Matching 4' x 9' flexible veneer

FLEX VENEER

Roseburg is one of the largest manufacturers of industrial softwood plywood in North America. Each panel delivers increased value, greater durability and long-term performance. Choose a stock manufactured panel or customize a panel to exact specifications for your specific application. No matter which method of panel construction you choose, you are assured Roseburg's industrial softwood plywood panels will consistently get the job done right.

Virtually all of our industrial softwood plywood can be produced FSC® certified if required for the project. Our diverse manufacturing capabilities make Roseburg the perfect choice for custom-produced industrial softwood plywood.

Patrick Lumber Company is a secondary manufacturer of high-grade niche softwood lumber products sold through distribution worldwide.

Douglas FIR

Douglas fir trees are the second tallest conifers in the world, and the predominant species in Pacific Northwest forests. Valued for its strength, stability, versatility and beauty, Douglas fir yields more timber than any other species in North America. Its lumber is used in building applications ranging from light framing to finish carpentry.

Patrick Lumber's Douglas fir offerings consist primarily of timbers, flooring (including 3x6 T&G decking), and rough industrial clears sold to window and door producers and other secondary manufacturers.

Hemlock Lumber

Western hemlock is extremely common in the western parts of Oregon, Washington and British Columbia. The wood is extremely versatile. Its design values make it popular in construction applications, while its workability and smooth, straight grain also give it value in industrial and finish applications.

Patrick Lumber sells a wide range of hemlock products both domestically and overseas. Customers in New England use it for exterior bevel siding, while others use it to make flooring as well as interior, exterior and garage doors.

Premium Hardwood Sheet Veneer & Edgebanding

Veneer Technologies, Inc. manufactures high end decorative hardwood veneer faces. They carry most domestic species and have access to many exotic species from around the world. They currently operate ten continuous cross feed splicers, producing approximately 6.5 million finished square feet of face veneer per month.

Sheet Veneer

Manufactured with a select grade face veneer crosslinked to a variety of backers. Backers include 10 mil, 20 mil, 2-ply with cross-grain back, 3M peel-n-stick, polyback, true phenolic. Sizes are 4' x 8', 4' x 10', 4' x 12'.

Wood Edgebanding

- Standard wood edgebanding
- 500' rolls, fleeced and sanded
- 250' rolls, preglued EVA hotmelt
- UV prefinished, preglued or fleece backed
- Widths ½" to 2"
- Custom widths and lengths available

Melamine Edgebanding

- Standard colors
- 250' rolls
- Preglued

Thick Wood Edge Rolls

- 328' rolls. Thickness 1mm, 1.5mm, 2mm and 3mm

MANY DOMESTIC AND EXOTIC SPECIES AVAILABLE

Four Diverse Composite Veneers

Brookline® Veneer

Brookline® veneer is the foundation of our entire line of veneer products. Brookline® is produced from a solid laminated block of dyed veneer. When sliced, each block yields 25" x 10'4" or 25" x 8'3" sheets of veneer, depending on the pattern.

Brookline® Paper

Bonded through heat and pressure to a variety of backings, the backed veneers are stress-relieved, sanded and trimmed. The resulting product is an extremely flexible veneer that is ideal for laminating to curved or flat surfaces.

Braewood®

We produce Braewood® by laminating Brookline® veneer to a paper impregnated with phenolic resin. The resulting product can be fabricated with the ease of a decorative laminate and requires only light sanding before finishing.

Braewood® Prefinished

This line of Braewood® is finished with a specially designed polyurethane coating. The process yields a durable, transparent coating which is resistant to water and heat. Each sheet is post-formable and available with a protective peel sheet.

Exotic and Eco-Friendly Veneers are also available.

Roseburg offers the most technically diverse line of medium density fiberboard (MDF) products in North America. From moisture resistant to flame retardant to no-added formaldehyde (NAF), Roseburg has an MDF panel to suit your every need.

Medex®
MDF

Medex® is a sustainable, moisture resistant, medium density fiberboard (MDF) panel utilizing a synthetic resin system and pre-consumer recycled wood fiber. Medex® is engineered for interior high moisture areas in non-structural applications and is used in place of sanded plywood or solid wood. With the versatility of a superior composite wood panel and the enhancement of indoor air quality, Medex® has been specified in hundreds of commercial, institutional and conservator projects since the 1980s. Manufactured in Medford, OR.

Medex® 	Medite® 	Arreis® 
CLICK TO VIEW BROCHURE	CLICK TO VIEW BROCHURE	CLICK TO VIEW BROCHURE

Medite®
MDF

Medite® is the foundation of the Roseburg MDF product line and offers a smooth hard surface, exceptional machining, plus clean, sharp edges for cutting and drilling applications. Medite® is a competitive workhorse representing uniformity in MDF and highly suitable for precision part manufacturing.

Arreis®
MDF

Arreis® Sustainable Design Fiberboard (SDF)* is the most affordable sustainable Medium Density Fiberboard offered by Roseburg. Developed specifically, using a patent-pending manufacturing process, to drive down the cost of environmental stewardship and simultaneously deliver the high performance MDF you expect.

Roseburg produces one of the most popular machinable particleboard panels on the market today. Our UltraBlend panels are a premium-quality, mat-formed, multilayer wood particle board. These panels are made predominantly of precision-refined wood particles that are bonded with thermosetting resins. UltraBlend features a highly refined smooth surface and tight uniform core with machinable edges and excellent dimensional stability. UltraBlend particleboard panels are designed for the demanding laminating and edge machining applications of today's precision woodworking industry.

Skyblend®
Particleboard

Unlike standard MDF that is for dry locations only, Armorite® Exterior MDF is engineered and designed for exterior applications including outdoor living spaces, signage, trim, cabinets, and for high-humidity environments such as bathrooms and mudrooms. Built to stand tough, Armorite® is manufactured with a formaldehyde-free resin, resists water (MR50 rating) and uses zinc borate to prevent rot, decay, and termites.

UltraBlend®
Particleboard

UltraBlend panels are a premium-quality, mat-formed, multi-layer wood particle panel, made of predominantly, precision refined particles bonded with urea resins. Roseburg offers its UltraBlend panels with a highquality smooth surface, tight machinable edges and excellent dimensional stability. UltraBlend particleboard panels offer controlled performance and precise physical properties for industrial applications. Featuring refined surface finishes with various core components, UltraBlend particleboard panels are designed for laminating as well as demanding edge applications and machining requirements.

RANGER

West Fraser medium density fiberboard (MDF) panels are composed of 100% western white softwoods that have a consistent light sandy color. The purity and long fibres associated with this material allow for deep, detailed profiling and smooth machining for easier and better finishing.

An added benefit of our panels is the light color of our MDF reduces color show-through when painting. The result is significantly longer tool life.

Ranger Board is western softwood-based MDF that is well known for its machining and painting capabilities. Ranger has a multi-opening press of 6' x 24', which enables the production of a wide range of thicknesses and densities from 3/8" through to 1 1/2".

- ➔ Used for furniture, cabinetry, flooring, and millwork. MDF is manufactured from ligno-cellulosic fibres (wood and plant dry matter) bonded together with a formaldehyde containing binder
- ➔ Standard finish on all panels is 150 grit
- ➔ Eco® and FSC® certified
- ➔ Moisture content: Average moisture content of finished panels as shipped is 4 - 6%
- ➔ Finished sizes available: Width 48" to 73", Length 48" to 205"

EnStron

Environmentally Strong

- FSC® Certified
- CARB Exempt
- ECC Eco Certified Composite
- Formaldehyde Free
- Moisture Resistant
- Fire Resistant - Class 1 (A)

EnStron Industrial is made from 100% pre-consumer recycled wood fiber, and no added formaldehyde. Manufactured in Post Falls Idaho, the board is produced from western softwood fiber, and environmentally sound pMDI resin. It combines the machinability and workability of pine and other whitewood species with the most environmentally sound resin technology in the composite panel industry.

Our particleboard provides a high quality standard and demonstrates our commitment to sustainability and indoor air quality. EnStron industrial particleboard is the ideal choice for office and residential furniture, kitchen and bathroom cabinets, shelving, and door core.

Conforming to ANSI standards, Grades LD2, M1, M2 and M3i are part of our standard offering.

EnStron products are available as FSC certified products for those individuals and companies, which have policies, that state a preference for FSC-certified products, Green building standards, including the US Green Building Council.

Spectrum melamine is available in a wide range of colors, wood grains, and decorative patterns. We also have access to hundreds of others with small order minimums. We thermally fuse the melamine to your choice of highquality substrates, most manufactured in our own facilities. Furthermore, we can custom-design and engineer a panel to meet your exact specifications, including panels up to 5-feet wide and 10-feet long.

Designer Series

Textured melamine panels are available in hundreds of colors and patterns to complement any design project. In addition, Spectrum offers a full range of thermal-fused melamine panels. From the traditional and understated, to the modern and bold, these panels deliver the perfect look.

Roll Laminates

Spectrum offers roll laminates that provide a durable, costeffective panel. All decorative laminate panels are available with No Added Formaldehyde (NAF) and No Added Urea Formaldehyde (NAUF). FSC® Chain of Custody certification is also available.

MIRLUX Premium Panel with its sleek, modern surface, available in high gloss or super matte finish with a color richness with depth and clarity, is a sustainable, low maintenance, durable and scratch resistant solution for kitchen and bath cabinets, interior casework, closets furniture, wall panels, retail fixtures and displays and other vertical surface applications.

MIRLUX is constructed of PET (Polyester - Polyethylene Terephthalate) laminated to super smooth, low surface variance TSCA Title VI Certified medium density fiberboard (MDF). The surface PET is co-extruded as .4mm film that is laminated with PUR adhesive that results in a water-resistant seal that won't delaminate and allows MIRLUX to have the smoothest surface possible.

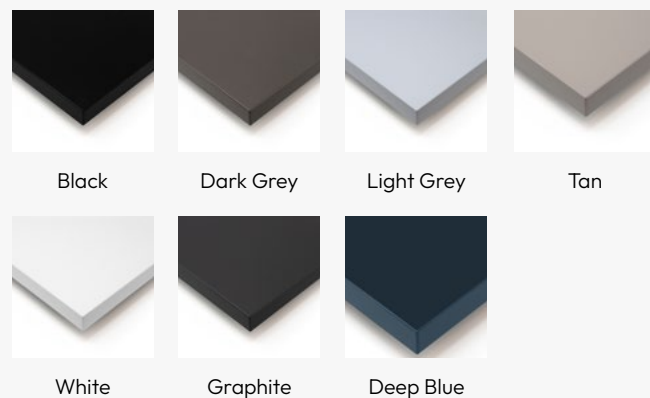

Features

- ◆ Super Scratch Resistant (SSR) coating, a hard coat finish for excellent scratch resistance
- ◆ Impact and shatter resistant
- ◆ Water resistant
- ◆ Hygienic, does not promote bacterial growth
- ◆ Stain and UV resistant
- ◆ Won't crack, peel, flake, or delaminate
- ◆ Edgebanding is stain, scratch and fingerprint resistant due to the SSR (Super Scratch-Resistant) coating. The solid color edgebanding are durable with a silky smooth texture. Ideal for high traffic areas
- ◆ The solid color edgebanding are durable with a silky smooth texture. Ideal for high traffic areas

Quality Millwork

Bright Wood Corporation manufactures wood components and millwork products. The company provides cut-to-size/cut stock components, veneers, and engineered components, as well as components for windows, doors, and furniture for manufacturers; and solid and finger joint door frames, flat jambs, split jambs, mullions, astragals, and moldings for distributors. The company was founded in 1960 and is based in Madras, Oregon.

Bright Wood has the advantage when it comes to engineering components, starting with a diverse equipment base and the shopfloor experts to run each type efficiently. This makes anything possible when it comes to manufacturing high performance components for doors, windows, and more. Bright Wood is known for linking different machinery together in flexible in-line systems so that products move seamlessly from one process to another without delay.

We have been manufacturing cut-to-size components since 1960. Like all Bright Wood products, you have a number of ordering options including species ponderosa pine, sugar pine, radiata pine, Bridiata Pine, or Hem/Fir), thicknesses (4/4, 5/4, 6/4, and 8/4), lengths, and whether or not you want the components finger jointed.

Custom processing is also available.

Shaker

Bright, crisp, and modern, this cabinet has a versatile appeal. The design incorporates the architectural shaker style with pleasing proportions. Shaker White is available with a slab or 5-piece drawer front yielding a contemporary or classic display.

- ◆ Full overlay doors provide a seamless aesthetic
- ◆ Soft-close doors and drawers prevent slamming
- ◆ Dovetail drawer craftsman construction
- ◆ Full extension drawers ensure easy access
- ◆ Durable solid wood cabinet box and drawers
- ◆ Premium Sherwin-Williams® finish
- ◆ Full line of accessories and upgrades available

Brooklyn

This transitional door complements a range of style from modern to vintage to traditional. The selection of color options within the Brooklyn line offers a solution for many design needs. Find modern charm in Brooklyn Gray or install a Slate island for the perfect kitchen accent that your guests will love Brooklyn's classic Bright White finish provides a timeless backdrop for a space that will become a gathering sport for years to come.

Lenox

This elegant painted door style is constructed from solid wood with applied moulding. The hand brushed glaze lines on Country Linen add an element of detail that conveys warmth and charm.

Taylor

Our Taylor line provides style, function, and full overlay, soft-close doors at a price point that's easy on your wallet. Blending traditional and contemporary. Taylor creates a classic and clean look that will endure for years to come.

Napa

The Napa White line is an adaptable option that adds dimension and elegance. The bright white finish and raised center panel provide a charming and traditional feel that is perfect for any home.
