

PANOLOCK+
MULTI-POINT LOCK

DOOR COMPONENTS MADE IN THE USA

Product Release

PanoLock+ Multi-point Lock

Release Date February 15, 2023

Endura's PanoLock – the first and only multi-point lock designed to be compatible with a wide variety of leading off-the-shelf handsets – just got better! We are pleased to introduce PanoLock+, which combines all the strength and functionality of PanoLock – PLUS the capability of working with most electronic and smart door deadbolts found in today's smart homes.

PanoLock+ uses the same innovative system of adapters as the original PanoLock to work with a wide variety of off-the-shelf hardware brands such as Schlage, Kwikset, Defiant, Reliablit and more. With expanded compatibility with Schlage and Kwikset electronic deadbolts, PanoLock+ is the most cost-effective high performance multi-point solution for fiberglass and wood entry doors in every home.

Since its launch in 2021, Endura has engaged in continuous improvement to ensure that PanoLock+ outperforms every other multi-point lock in the marketplace.

Features:

- Compatible with a wide variety of off-the-shelf handsets and deadbolts, including electronic deadbolts.
- Compatible with standard 5 1/2" center-to-center cross bores and accommodates a 2 3/8" backset.
- Tapered upper and lower bolts – operated by the deadbolt – that engage easily with adjustable roller strikes even when the door is misaligned up to 3/16" along the jamb leg (1/8" with electronic deadbolt).
- The operation of the middle strike has been decoupled from the dead bolt. This allows the door to be locked "normally" without engaging the multipoint while also reducing the torque needed to throw the upper and lower tapered bolts.
- Adjustable roller strikes allow the bolts to pull the door panel snugly against the weatherstrip. Adjustment is +1/4" and – 1/8".
- Reduced operating force – PanoLock+ works with a deadbolt operating force as low as 2 in/lbs.
- PanoLock+ achieves the same certified testing results as the original PanoLock – up to DP 75 structural ratings and meets ASTM E 30 forced entry testing.

Product Availability

- PanoLock+ is offered for door heights of 6/8 and 8/0 and works for single, sidelite, French and multi-panel configurations. For French doors, PanoLock+ must be utilized with Endura's PanoLock Ultimate Astragal.
- PanoLock+ is offered in 2 widths – 1" for book edge doors and 1-3/8" for bull nose door edges
- Two Faceplate finishes – Bronze and Satin Nickel
- Five Strike Plate finishes – Bronze, Satin Nickel, Black, Bright Brass and Stainless Steel.
- PanoLock+ fits into existing door panels routed for PanoLock.

Product Compatibility

- PanoLock+ works by integrating a series of adapters designed to be compatible with many off-the shelf handsets and deadbolts. For installation instructions, please refer to the following:
